

WORLD HAPPENINGS  
BRIEFLY TOLD

The Retail Merchants' Association, London, Ont., has opened a drive toward making Boxing Day (Dec. 26) a legal holiday throughout Canada.

Russia has set up a \$4,000,000 war budget, boosting her defence estimates for 1937 more than \$1,000,000 over last year's.

Twenty-one cities out of 27 which held civic nominations in British Columbia recently, elected their mayors by acclamation.

What was described as the first metropolitan daily newspaper published exclusively for children appeared from the presses of Nichi Nichi, one of Tokyo's great papers.

The New York-Pauls air race originally scheduled to start May 21 in commemoration of the first transatlantic flight by Col. Charles A. Lindbergh, has been postponed until August.

Nine spiders were ingeniously mounted between sheets of glass and made visible by white powder and a black background, form an interesting exhibit at the Natural History Museum, South Kensington, London.

Silicosis in the last 10 years has cost the Ontario workmen's compensation board \$600,000 and this year will likely cost \$600,000. Hon. Dr. J. A. Faulkner, Ontario health minister, told a labor delegation.

Professor Pelham Edgar, president, told the annual general meeting of the Association of Canadian Bookmen that membership had grown to 2,300. A year ago there were only two members, he said.

## Sunken Treasure

Searching For Gold In Vessel Wrecked In 1780

In quest of millions in sunken gold, Simon Lake, 70-year-old submarine inventor, tricked half a dozen rusty coins through his fingers and brooded wryly on the "profits" of treasure-hunting.

"Nickels," he murmured, "nickels, and dimes and pennies." That's all he has to show, so far, on his three-year search for the wreck of the British frigate *Husar*, lying 12 fathoms deep in the swirling currents of New York's East River, where the ship sank in 1780.

In cold cash, Lake has retrieved \$387—disregarded by auction pumps delving in the muddy river bed for the hulk of the treasure ship. Lake is mystified about the coins. They're not old English coins from the *Husar's* treasure trove. They're just fairly modern American specie—the oldest being a 50-cent piece, dated 1914.

"The river bottom must be thick with them," he says, pointing out that the suction pump has operated only around a small sector.

Under the heading of junk, Lake displayed a segment of false teeth, a cheap watch, a pair of brass knuckles, a skeleton and a hand-hatched knife of dubious price.

For more than half a century Lake watched a dozen or more expeditions try to locate the *Husar's* golden cache.

"The pretty area I've located the wreck," he said, "but it is buried under mud and tar and it may be weeks before we strike the bulk itself."

The *Husar*, a full-rigged 28-gun frigate, was wrecked while fleeing with money for the redcoats army after the American revolutionary forces had driven British troops out of New York city.

## Silk For Coronation Robes

Will Be Largest Amount England Has Produced For 300 Years

Intended for the coronation robes of King George and other members of the royal family, 500,000 miles of silk thread is being reeled off from cocoons behind the old walls of Lullingstone Castle at Eynford.

This is the first large amount to be produced in England since the days of King Charles II. Nearly 300 years ago. It is the result of the latest hatch on the Lullingstone silk farm, with its 60,000 mulberry trees to feed silkworms, which is operated by Lady Hart Dyke.

The silk produced there is considered too valuable to be used in the making of the most expensive silk stockings. Queen Mary recently inspected the farm and expressed keen interest in the preparation for the coronation robes.

## Serial Has No End

Has Been Running In Japanese Newspaper For 20 Years

In one Japanese newspaper they run a serial story that a veritable Thousand and One Night's Romance. Already it has passed its 7,300th installment, and this story without apparent end is expected to last for many more months, although it has been running continuously for over twenty years.

Its author has been dead these many years, but that didn't damp the newspaper's enthusiasm for its lengthy tale—they called in the author's son, and each week the story continues as before. Fortunately this author also has a son!

The Stockton and Barlington railway, in England, was the first public railway in the world. It opened Sept. 27, 1825.

## A Form Of Carelessness

Open-Faced Sneezers More Dangerous Than Reckless Motorists

The following is an article from the health service of the Canadian Medical Association, particularly apposite at this season of coughs and colds and influenza epidemics:

We read almost daily in the press the sad results of carelessness of pedestrians and motorists, but we seldom, if ever, read of the sad results of the carelessness of "open-faced" sneezers.

Nevertheless, the "open-faced" sneezer is more dangerous than the careless motorist. A person is guilty of criminal negligence who is careless and lacks consideration for others; who, without any thought, sneezes, showering particles of material from his nose and throat all around him.

A man who strikes another is guilty of assault. Public opinion, as expressed in the law, does not allow of such assaults, and requires that the person who commits one be punished. A far more dangerous assault is committed by the careless sneezer. Public opinion should recognize this and stop it.

Disease germs pass out in the secretions of the nose and mouth. A sneeze casts a germ-laden spray for ten feet. If the sneezer covers his nose and mouth with a handkerchief, the danger is practically ended. If the desire to sneeze is too sudden to allow using the handkerchief, the head can at least be lowered and the spray directed to the floor, not into other people's faces.

In addition to these actually ill, many persons carry disease germs in their nose and throat. People with colds continue to go about their business. For these reasons, the sneeze may be the means of spreading disease, and, for these reasons also, an end should be put to the "open-faced" sneezer.

## Mining Industry Booms

Average Value Production Nearly Million Dollars A Day For 1936

Topping all previous records, an average value of nearly a million dollars per day for every day during 1936 was placed on the production of Canadian mines and quarries, including metals, fuels, non-metallic minerals and fuels and structural materials.

The year's output, valued at \$360,340,000, an increase of 15.4 per cent. over 1935. Increases in output of many mineral products and improved prices for several metals combined to make 1936 a record year in the mineral production of Canada.

Production of the metals group reached an all-time high of \$256,338,000. This was an increase of 16 per cent. over 1935 and represented 71 per cent. of the value of the total mineral production.

Fuels, including coal, natural gas and crude petroleum had a value of \$61,002,000, an increase of 11 per cent. over 1935. Non-metallic minerals, other than fuels, rose 32 per cent. to \$16,553,000 and structural materials gained 15 per cent. to reach \$26,670,000.

Gold production at \$720,505 fine ounces exceeded the previous record output of 1935 by 13 per cent. Nickel output at 167,713,000 pounds was a record while the production of lead and zinc at \$77,905,000 and \$36,014,000 respectively reached new peaks. The output of coal amounted to 15,052,000 tons was the greatest since 1929. Asbestos production at 307,598 tons exceeded that of any former year. Production of salt was at a new high point with 284,149 tons. Gypsum output totalled 788,287 tons, an improvement over 1935.

## To Balance Accounts

Nova Scotia Exhibition Commission Would Tax Performing Rights Society

The Nova Scotia Exhibition Commission decided to ask the provincial government to pass legislation compelling the Canadian Performing Rights Society to pay an annual license fee of \$50,000 to operate within the province.

Licensing the society was sought after Mayor E. J. Cragg, of Halifax, vice-president of the commission, drew a letter from City Solicitor C. P. Bethune, calling the commission's attention to the fact it was liable to a \$130,000 tax by the society for use of copyright material at the provincial exhibition.

## Cutting The Cost

College education for 145 Oklahoma farm youths at a cost of \$150 a year or less for living expenses has been made possible at Oklahoma Agricultural and Mechanical College through a co-operative dormitory. Farm agents in each county in the state were designated to select two outstanding farm youths for enrollment.

In Turkey, the lower classes invest their savings in copper utensils, their standing in the community being measured by the number of such utensils they possess.

Resumption of trade with Germany is prospering Lithuania.

Japan reports that suicides increase when the weather is humid.

Six of the chartered banks in Canada have 147 branches in other countries.

## U.S. National Defence

Plan To Begin Construction Of Two New Battleships

A record peacetime national defence fund of nearly \$1,000,000,000, including money to begin construction of two new battleships, was edited by President Roosevelt for the 1938 fiscal year.

Increased expenditures for airplanes, ordnance equipment and expanded personnel for both the United States army and navy also were proposed.

The president recommended in his annual budget message to congress a total appropriation of \$880,763,000 for the naval and military establishments, an increase of \$2,860,000 over estimated outlay for the current fiscal period ending June 30.

The 1937 national defence estimates, aggregating \$887,881,000, constituted the previous peacetime high. Actual appropriations for that period, however, amounted to \$916,347,381.

To start work on the two battleships, the keels of which he ordered laid only a short time before transmitting increased to \$887,802,000 the original navy department estimate for 1938 of \$653,994,359.

The budget, besides providing sums necessary for carrying out the navy's regular building programme designed to expand the fleet by full allotted strength by 1942, proposed an outlay of \$48,500,000 for the bureau of aeronautics, a \$10,000,000 increase over 1938.

Of this sum \$28,000,000 would be used to purchase about 400 new airplanes, compared with \$37,000,000 authorized for that purpose this year.

The president proposed that navy-mine pay be boosted from \$201,216,452 for 1937 to \$214,687,000, to care for additional recruits required by the commissioning of new ships, and that total army pay be raised from \$154,323,560 to \$162,349,100, to cover similar authorized enlargement of enlisted strength.

## Skilled Workers Needed

Chicago Firm Advises Young Men To Learn Trades

Young men, out to building and modernization, air conditioning, capital goods manufacturing, development of streamlined transportation, steel aviation, automobile production. So say executives in more than 2,000 of Chicago's leading firms. Results of a study just completed by the Chicago Association of Commerce reveals greater futures for American youth in these fields.

A shortage of junior craftsmen and apprentices in skilled trades, already is bringing wrinkles to brows of employers.

One hundred of them report to the association that WPA connections are offered by many as reason for objecting to private employment. Objectors complain, employers report, that they aren't guaranteed permanent places, can't get back on relief when private jobs end. Relief officials hold, though, that they can.

The fact remains that skilled workers are needed now, that many more will be needed as the economic upturn continues.

## Had Wish Gratified

"Bobby" Gay, a patient at the War Memorial Children's Hospital, in London, Ontario, got just what he wanted from Santa Clause. For two years he has lain in bed, but Christmas Day he walked, not on his own feet.

"Bobby is an amputation case—born on artificial feet completed Christmas Eve in the splint room at the hospital.

## SLIMMING PROCE WERE ADMIRATION WHEREVER YOU WEAR IT!

By Anne Adams

"Charming" is just the word for this lovely, slimming frock! For whoever wears Pattern 4295, will appear slim, young, and pretty in its graceful flattery! What could equal the appeal of the deep V, filled in by a trim vest that is livened by three gay buttons! Then, too, you've fascinating choice of three different length sleeves! Anne Adams needn't tell you that the clever up-rising skirt-yoke, cut in one with the neat panel, is the latest thing in the fashion world, and this feature makes you look inches taller! Wherever you wear this frock, you're sure to be the centre of admiring glances, and no one will ever guess how easily you made it. Choose monotone crepe, synthetic silk and heavy georgette.

Pattern 4295 is available in sizes 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3 1/4 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

## Coronation Bible

No Portrait Of The King And Queen Elizabeth Will Appear In

This line with the portrait of himself and Queen Elizabeth will appear in coronation issues of the Bible.

It was understood His Majesty deemed it inappropriate that portraits of living personages should be reproduced in the Bible. Portraits of the sovereign in the Bible appeared during the three previous reigns.

In England Bible printing is a monopoly of the King's printer, and the two great universities, Oxford and Cambridge.

Like elephants and many other animals, horses can sleep while standing.

The Bank of England began active operation on January 1, 1895.

## Air Rifles Are Dangerous

Menace To Public Safety And Should Not Be Sold

A young man may lose the sight of an eye as the result of a boy's carelessness with an air rifle. Two lads in possession of air rifles in the neighborhood have been summoned to Police Court. But this is a case of locking the stable door after the horse is stolen. It will profit the victim nothing even though a conviction should be registered and the boy punished for his offense.

At the very same time that this incident took place, a resident in the east end had his bedroom window perforated in two places from the same cause.

Air rifles are a menace and their sale should be prohibited by law. It is contrary to law to sell dynamite to children because it is a highly dangerous explosive. The air rifle is not so likely to cause serious injury to the owner but is even more likely to cause damage to other people.—Toronto Telegram.

## Attracted Much Attention

North Carolina Village Advertised For Two Used Jail Cells

Calypto, a North Carolina hamlet, broke into the news recently by advertising in outside papers for "two used jail cells." At latest report nobody with "used jail cells" had answered the ad, but it attracted a lot of attention from curious folk who wanted to know why Calypso wanted "used jail cells." Until last summer, Calypso correspondent explains, the town got by without a jail, sending its occasional offenders to the lock-up of a neighboring village. Then, it appears, some Calypso booster talked the community into seeking WPA aid for public improvement. The "improvement" took form of a brick building to be used as a jail and for other municipal services. When completed, it was found that no provision had been made for the "jail cells." Hence the advertisement for "used cells."

## A Valuable Painting

Reported To Be Worth \$100,000, Will Be Returned To Vancouver From New York

An oil-painting by Bartolomeo Esteban Murillo, once available to Vancouver city museum for \$2,000 and now reported to be worth \$100,000, will be brought back to Vancouver from New York.

But the painting which hung for more than thirty years in an obscure corner of the museum will not be loaned again to the city, Hugh Maxwell, its Vancouver owner, said. Instead, it will be placed in a bank vault for safekeeping.

First announcement that the picture was once available to the museum was made by T. P. O. Mendes, curator of the museum, who said he had strongly urged the board of directors to buy it, but the board did not buy. "Nobody in Vancouver would believe it was really a Murillo," Mendes said.

Fritz Kreisler, when he was in Hollywood, was invited to dinner at the home of a prominent producer and was asked to bring along his fiddle. "Sorry," said Kreisler, "but my violin never dies."

"But if you don't especially like the girl, why did you ask her to marry you?"

"Well, her family have been very nice to me—and it's one way I can repay their hospitality."

## Foreign Exchange Savings

Cost Of Settling Foreign Accounts Of Post Office Department Cut In Half

Cost of settling the foreign accounts of Canada's post office department were practically cut in half this year. Under the new operation of the department with the Bank of Canada, it was learned.

Transactions in foreign exchange, which amounted to more than \$37,000,000 a year, have been one of the major problems of the financial branch during the last five years of vacillating exchange rates, with grey hairs resulting for more than one official.

The result of these savings to the man on the street, though he hears little about it from the department, is reduced cost on money orders to the United States, Britain and elsewhere, which, in the aggregate, reaches a substantial figure. Since orders are sold closer to the market rate now, where there might have been a five-cent exchange charge on sterling before there is one of about two cents; where the margin charged on United States dollars was around two cents, it is now half a cent or one cent.

## Easier To Find North Pole

Arctic Explorer Could Not Locate His Hotel In Halifax

Sir Hubert Wilkins, Arctic explorer, thinks it's easy to find the North Pole, but slightly hard to find his way around Halifax.

He became lost in the city trying to find the railway hotel before sailing for England on the Hamburg-American liner *Deutschland*, he confessed to a friend.

"Why isn't it labelled?" questioned the bewildered explorer, who eventually discovered the big brick building right under his nose. "I thought it was the city hall."

In England, Sir Hubert hopes to obtain financial backing for a second attempt to reach the pole by submarine.

His 175-foot underwater craft, which he himself planned, would be like a "decked-in houseboat," with every comfort, he explained.

## Depends On Custom

People, Not Foods, Are Queer According To Explorer

It's all wrong to raise your eyebrows at the things some people eat—meat, for instance, or army worms. Food is not a queer thing, it is people—human beings—who are queer about what they eat, declared Matthew W. Stirling, well-known explorer and chief of the bureau of American Ethnology, in a lecture.

Adding that he has eaten grasshoppers and grubs only sparingly, as a sort of experimental duty, Mr. Stirling pointed out that we may turn up our noses at a dish of parched grasshoppers served by Indians in Nevada, but he has eaten Africa, but the natives are just as disgusted at our curious custom of eating eggs.—Detroit Saturday Night.

## A New Industry

Laboratory Is Cultivating Ladybugs To Eat Other Bugs

A new kind of live stock raising—growing of ladybugs to eat other bugs—was announced before the Entomological Society of America in Atlantic City, N.J. The ladybugs are cultivated in the laboratory and sent out to farmers to eat up the bugs on their plants. Dr. Gordon W. Haugh of Ohio State University told the entomologists he feeds the ladybugs carefully throughout the winter on their favorite food, insects known as aphids in order to have armies of them ready in the spring to start their campaign.

## An Unusual Operation

Surgeons In London Hospital Scraped Deposit From Man's Heart

By a remarkable operation a deposit on a man's heart was removed at the Royal Chest Hospital in London. For four years William Harley was an invalid because layers of calcium were forming on the membrane covering the heart and constricting the great veins running into it. Surgeons finally agreed that the only remedy was to scrape the deposits away. His chest was opened, and the scraping was done. A blood donor stood by, in case a transfusion was needed, but all went well. The patient spent several days in a hospital tent, and was expected to leave the hospital six weeks from the time of the operation.

## Leipzig Zoo Holds Record

The Leipzig zoo recently announced that a thousand lions had been born within its walls, a record said to be without parallel in the history of zoological gardens of the world. The Leipzig zoo breeds wild animals for other zoos throughout the world.

Nerve threads to the number of 17,000 have been counted in the marrow of the human spine, and their diameters, some as small as 0.01 millimeter, measured.

The first mail on the American continent started from New York City to Boston, Jan. 1, 1873.

So many are willing to try anything to make a living except work.

## Relics Being Preserved

Canada's Flying History Is Being Shown In Museum Collection

Relics of the earliest developments in Canadian aviation are now being preserved, the whole story of Canada's unique part in the progress of flying being told in collection in process of assembly at the newly established aeronautical museum housed in the building of the National Research Council in Ottawa.

Acquisition of the various exhibits has occupied Major General A. G. MacNaughton, chairman of the National Research Council, for some time.

Most important is the engine of the "Silver Dart," which made the first successful flight in the British Empire. This plane was built by the late Dr. Alexander Graham Bell at Baddeck, N.S., and flown in February, 1909, by J. A. G. McCurdy. Associated with McCurdy was F. W. "Casey" Baldwin, pioneer aviator, yachtsman and member of the Nova Scotia legislature.

First flight by the "Silver Dart" was half a mile, on February 23, 1909. Next day, at 30 feet, 4 1/2 miles was covered over the Bras D'Or Lakes, while on March 10 all previous records were shattered when the "Silver Dart" flew 20 miles.

Five months later the machine was crashed on landing at Petawawa camp when Baldwin was demonstrating it to military authorities.

Other exhibits in the new national museum include the model propellers carved by Dr. Graham Bell while studying aerial methods of propulsion.

The war-time "crate" flown by the late Col. W. A. Barker, V.C., one of the Canadian aces of the Royal Flying Corps, is in the collection. The wings and fuselage are riddled with bullet holes, all of which have been carefully patched, but which are nevertheless noticeable.

## Involved Much Work

English Sculptor Found Lion A Very Restless Model

It is likely that Sir William Reid Dick will be the sculptor, and Sir Giles Gilbert Scott the architect, of the memorial statue of King George to be erected facing the House of Parliament.

Sir William, a cheerful Scot of 57, has the advantage that he made a portrait bust, commissioned by King George himself, only three years ago. One of his best-known works is the granite stone lion on the Menin Gate Memorial at Ypres. It involved far more work than any human portrait, for Sir William found when he looked for models in the Zoo that the lion is a particularly restless creature.

A year younger than Sir William, Sir Giles Gilbert Scott has been famous much longer, for he was only 22 when his design for Liverpool's £1,500,000 cathedral was accepted.

When the nave was finished he was passing through a middle-aged woman spoke to him, not knowing that he was the architect.

She rhapsodized about the beauties of the building, ending with, "And to think that it could have originated in the puny brain of an insignificant man!"

Scott, duly put in his place, fled without a word.—London Daily Sketch.

## Record Is Unusual

Lord Crewe Held Position Of Confidence Under Three Former Sovereigns

The graceful little speech in which Lord Crewe, in the House of Lords, incidentally referred to himself "as one who, like very few of your lordships has had the honor of serving three former sovereigns in a position of confidence" must have sent a good many people's memories searching into the past. The last Liberal Ministry of Queen Victoria's reign went out of office in 1885, so that we are carried back forty years at least. Actually Lord Crewe, who is 79, was Lord Lieutenant of Ireland under that administration. At the current exhibition at the Renaissance Art Gallery her painting "Delphinium," a study of stately blue stalks in her Edmonton garden, is on exhibit.

Mrs. Fleming, daughter of Mr. and Mrs. T. Van Delind, of Calgary, has won distinction with her floral paintings at Canadian art shows, particularly in Montreal, Toronto and Winnipeg.

She is a member of the Edmonton Art Club and the Alberta Women's Painters' Association.

Canada imports most of her coffee from Brazil, British East Africa, Colombia, and Jamaica. Green coffee consists most of Ceylon varieties. Grinding, blending and roasting are handled by a Canadian industry.

Shipyards of Germany have orders on hand for 180 vessels.

INDIA PREPARES FOR COMMENCEMENT OF NEW SELF-GOVERNING STATUS

## young MOTHERS

Take no chances. Children's colds are best treated without "drugs." At bedtime, just rub on **VICKS VapoRub**.

## Thou Shalt Not Love

A NOVEL BY —  
GEORGIA CRAIG

CHAPTER XII.—Continued

There were a number of developments the next day. The majority of them quite to be expected.

While Sapphira served her breakfast in bed, considerably surprised and pleased that her charge showed no indications of suffering from a hang-over, though there undoubtedly was something troubling her mind, Starr read the morning papers.

An account, in one of the more gossip sheets read:

"Merrymakers at the exclusive Sea Beach Casino last night were treated to an unexpected thrill when Starr Ellison, author of the widely notorious book, "Play-Girl" and who is said to have herself furnished the copy therefor, attempted to stage a nude swimming part in the gold-fish fountain. Only the timely—or untimely, many witnesses characterized it—intervention of Michael Fairbourne, publicity representative for the Tarrance Publishing Company, prevented—"

Starr flung the paper away, sickened. How Michael must hate her! There was small comfort now in the thought that that was what she had intended to make him think of her.

Shortly before noon a messenger from Cartier's appeared with two armed guards and a package from the famous jeweller. Starr gave the messenger her receipt and took the package into the bedroom to open it.

It was a bracelet. A bracelet three inches wide, solidly set with diamonds encasing a row of the most gorgeous fire opals Starr had ever imagined in her life. The thing must have cost a fortune.

Sapphira's eyes goggled almost out of her head when she saw it. "For the land, Miss Starr, ain't that shore scrumptious! Seems like somebody must be thinkin' a heap of you, chile. . . . What's them flashin' kind o' stones that look like rain-bows, honey?"

Starr smiled wanly as she answered absently, fingering Lance Marlowe's card that had come with the gift.

"They're opals, Sapphira—fire opals."

The breath of the colored woman came sibilantly.

"Opals! Lawdy, Miss Starr, don't you all know they say opals can bring the hardest kind o' hard luck? What's for he want to send you opals?"

"They can't hurt—me, Sapphira," said Starr, her voice low.

She was studying Lance's card. On the back he had scribbled:

## To Alkalize Acid Indigestion Away Fast

People everywhere are adopting this remarkable "Phillips" Way.

The way to gain almost incredibly quick relief from stomach conditions arising from overacidity, is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' way after meals, or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid" headache, indigestion, indolence in food or smoking—and nausea are relieved. You feel made over; forget you have a stomach.

Try this Phillips' way if you have any acid stomach upset. Get either the liquid Phillips' way or the Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM: Each yellow tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

MADE IN CANADA

**PHILLIPS' MILK OF MAGNESIA**

"I told you these were for you, you lovely thing of fire and ice. . . . I have been very patient, Starr. Are you going to keep me waiting forever?"

She could not pretend to herself that she did not know what he meant. It was plain enough. Lance was forcing her hand. She had stalled with him long enough. Lance was not used to that. She knew—as she realized he meant her to know—that to accept this gift of his meant to become his mistress. Refusing it would terminate their friendship. There could be no more halfway measures.

She held the gorgeous bracelet in her hand, turning it, letting the sunshine catch in the sparkle of the stones. The diamonds were lovely enough, but those fire opals! Lance must have given a commission to Cartier's to search out the most marvelous stones anywhere to be found. A memory of Michael's words fitted through her mind:

"Lance's favorite indoor sport—buying diamonds for his current light of love!"

Irony of all ironies! This morning Stephanie Dale would be proudly wearing Michael's diamond on the correct finger. But she, Starr, who had dramatically surrendered the man she loved to Stephanie, received a diamond bracelet—symbol of the kept woman!

She was still weighing the situation in her mind when Michael arrived. Starr had not expected to see him, and it is possible if Sapphira had not ushered him into the living room without announcing him, blandly unconscious that he might not be as welcome as always, Starr might have refused to see him. She needed more time to pull herself together before facing him.

The bracelet was still in her hand as she came through her bedroom door and saw him. Startled, she slipped the glittering thing inside the neck of her frock. She shivered. The stones felt hot and cold against her tender flesh—as icy as the heart in her breast.

"I've come to release you from your bargain, Starr! It was a mistake from the beginning. . . . You will be glad to be relieved of it as I am. This last episode—" he flouted before her eyes the tabloid in which was the account of last night's party which she had already read, pounding on it objectionably with an angry finger—"was the finish! It was too much—even for sweet publicity's sake!"

In the face of her dazed silence he plunged on:

"I told Stephanie that the whole thing was a mistake. . . . It was done, and she understands. . . . I hope other people will, too. Anyway, I am ready to shoulder the ridicule, if there is any. Stephanie thinks that it is the best that we—that I—can do. . . . At whatever cost, she prompted him cruelly. Michael's face went red, but on her was the same tantalizing dare-devilry of "Play-Girl," taunting, diabolical.

Then a spark of resentment flared within her. If he had not mentioned Stephanie! She blazed out at him:

"Because everything hasn't gone all your own way, you want to get rid of me! I see! Her taunting, challenging laugh ripped. "Well, suppose I don't choose to be got rid of?"

Michael glowered, said ruthlessly: "I shouldn't think that even you would want to control him in the role of 'Play-Girl'! Before when she had thought of it, she had given it slight consideration, taking it as a matter of course that it would continue. Now . . . Well, if he didn't go on with it, what was her alternative for the days that still remained to her?"

She could not bear to face it all again. She had to have life about her, color, excitement!

But there was an alternative, if she cared to take it. Lance offered a ray. Though course she realized that he would not be nearly so enthusiastic if she were a mere nobody and not "Play-Girl" at all. Lance wanted the triumph of making a conquest of the glamorous personality about whom the whole town was talking—the "Play-Girl" who was all fire and ice. And good publicity.

Lance. . . . All of a sudden she realized that Lance's bracelet had been sent not against her but as if the fire opals were in reality living flame.

Michael was offering the supreme insult. He was pulling his check book from his pocket, slowly drawing out his fountain pen. His voice was cold, business-like, and he did not look at her.

"How much do you want, Starr, to step out of the picture?"

Now her resentment was a blazing torch which she held before her body savagely. A raging, black-eyed young fury snatched the check book from his hand and hurled it into his face, returning hate for hate.

"I don't want money from you!" she flamed now. "No, you wouldn't touch it if it were millions! I can get along. I'll show you! I'm going to keep on being 'Play-Girl' and you can't stop me! They'll laugh at you if you try to deny it—they'll say you're a snipe when you tell them you've done your belly-aching to sell me, Mr. Michael Fairbourne, to try to back out now! You started something! I'll finish it! Now get out of here! Get out!"

The hours that passed after Michael left were so slow and terrible that Starr welcomed it with joy when Lance called up and asked if he might drop up for a few minutes, and did she like her bracelet. She was glad he was coming, though as she had not the faintest idea of what she would tell him. All she knew was that anything was better than being alone with her awful thoughts. Anybody!

Lance wasted little time coming to the point of the real reason for his visit. It was the same old line.

"But I don't see why you're insisting on delaying, Starr," he pressed her, as she lounged over her cocktails. "I can give you everything—you can go on with your writing. If you ever want to write any more—and—there was an odd infection in his laugh—"really I'm conceited enough to imagine I might make good copy."

Starr's eyes dropped, and a faint flush touched her cheeks.

"It—it—Oh, I mean it all seems so—rather cold-blooded, Lance—the whole arrangement you're proposing. I've always thought that—well, that love ought to have something to do with it."

"I'll teach you to love me, Starr!" he said eagerly, as his hand crushed her slight fingers until she winced as the antique Egyptian ring pressed into the tender flesh.

She glanced up into his amorous eyes, shook her head a little, and there was a far-away expression on her face.

"I wonder," she said softly. "I wonder if I ever will know what love really is. . . . I don't know." He laughed a little shortly. "And I don't know why I'm mad about you, but I am."

Starr's black eyes twinkled. "Shall I tell you?" It was because I'm probably the first woman on whom you set your determination to possess who didn't fall for you the first minute you snapped your fingers."

Lance's arm slid around her, and he bent over to kiss her.

"You will fall for me, young lady!" he laughed confidently, even a little arrogantly. "You don't know me when I get really started."

"I know you have a good line," Starr smiled, and Lance nodded.

"Quite so," he remarked. "That's what I've been told. Properly heated, but never hard-boiled."

Badinage was not enough for Lance Marlowe, however. He very quickly got to the point of pressing his questionable suit with Starr. And then he suddenly realized—just how it had come about that he did not know—what she had given Lance Marlowe her promise to give him his answer that night. At whatever cost!

Parties were parties—just so she could keep moving and have no chance to think of love.

If she accepted him in the sense . . . wanted to be accepted, she was to wear his bracelet, and then he would know that she was longed to him, was willing to be his current light of love.

She was still stalling for time, a little frightened by Lance's instant eagerness. At last she told him, rather shakily, trying to recapture a fragment of her daring "Play-Girl" camouflage:

"A bride is allowed time to arrange her trousseau, Lance. Haven't a mere mistress the same privilege?"

"All right, Starr. If she can make it snappy."

Finally Lance, too, got restless, and suggested a drive. That appealed to Starr far more than just sitting here in this quiet room, tete-a-tete with the man whom it might be soon would see far more of than she cared to see. She jumped to her feet.

"With you in a minute, old thing!" she said gaily. "As quickly as I can slip into something that will not cause so much comment on the avenue as this rag might."

It was a golden afternoon when they started out in Lance's expensive car, though growing a little late. The sky was still lapis lazuli. There was a touch of Autumn haze and the smell of Autumn in the air which somehow manages to make its way into the streets of New York in spite of the skyscrapers and lack of trees. Lance drove across town and they turned into the Park. He drove aimlessly, because this strange, moody "Play-Girl" had told him as soon as she snuggled down beside him that she wanted to be very quiet, and that she had no other plans.

She was thinking. There must be a little peace somewhere in the world, if she could only find it. Did it lie with Lance?

After all, why not let Lance propose a quiet, luxurious setting for the rest of her short days? It was the easiest way. Life surely owed her much, after the shabby deal it had handed her.

Marriage with Michael would have been cheating. Lance would have offered him in return for anything he offered her. Lance did not want a wife, nor a home. All he wanted was a scintillating mistress, one who would make him the envy of his fellows. Well, she could be that to him.

"A puff of wind will break the glass; then there'll be no more Starr."

Unconsciously she voiced aloud the question brooding within all of her thoughts pivoted forgetting her reputation—the reputation of "Play-Girl" who had had too many lovers:

"Is there any virtue in remaining good when everybody thinks you're bad?" It was the old question—of the game and the candle.

And then she awoke to a realization of Lance's presence. He was staring at her with his keen, restless eyes. Avowedly, the loveless man he had desired since he first set eyes on her. His thin eyebrows were raised, his mouth a crooked, sardonic line.

"My dear Starr," he drawled absently. "You are talking very queerly to-day. Was it too much champagne last night?"

Starr flushed. Delicate eyelids drooped, shading her long, willowy eyes from him.

Perhaps she murmured, wondering what the servants would say or think when they found that flower bowl.

She must snap out of this mood. This was not the kind of mistress Lance Marlowe wanted to adorn his penthouse. He demanded gaiety, vivacity, sophistication.

She noticed suddenly that they had left the Park behind and were on the Avenue, headed downtown again. She turned to Lance questioning.

"Where are we going?"

He grinned at her. "To congratulate the bride-to-be."

"Stephanie Dale?" A sharp breath caught in her throat. "But I don't want to see Stephanie! I don't like her!"

"Stephanie wants to see you," Lance remarked with decision. "She particularly asked me to bring you. No one would ever imagine that there was a peculiar light in Lance's eyes. For a moment Starr had a suspicion that he guessed her secret.

Why? Why should Stephanie want to see her? What extra humiliation was this? She would not stand for it! She couldn't stand any more.

Incredibly enough, as she shortly discovered when Stephanie came to greet them in the drawing room of her fine old home, with all her ancestral portraits looking down from the walls, Stephanie wanted to apologize to Starr Ellison. She did it very prettily. She was like a complacent little pink and white doll when things were going her way, as they were at present. No one would ever imagine that words of violence could fall from soft lips, or venom show in her sapphire eyes.

"I'm terribly sorry for some of the things I said to you," she began, looking to Starr. "I hope you'll believe that it was just because I didn't understand, and when a girl loves someone—"

She sighed and there was an expression in her eyes that said of course, Starr might not be expected to understand the true meaning of love or its nuances. "When I realized that you were not 'Play-Girl' at all—a secret between Michael and me, of course—(Her eyes said, 'Michael might not be expected to understand the true meaning of love or its nuances.')"

Michael's "Play-Girl" that there was no question of Starr's fitness for the role—when I found out that Michael was just paying you to do the things you did; that the whole thing was planned because of his great love for me—"

Starr winced. Stephanie was subtly rubbing it in. But her blue eyes were childlike and innocent. Too innocent. She rattled on:

"I'm giving a week-end party in honor of Michael at our home in Westchester this week, Miss Ellison. Michael and I are driving up there this afternoon. It has to be done all in a hurry because—well, because everything will be busy from now on. We just can't wait to be married, now that Mother and Father have finally given their consent—"

(She said that as though she and her blessed parents were doing a favor for Michael.)

"I didn't say I approved!" Michael flung back at her furiously.

Instantly each of them was on the defensive again, dangers unheeded, hands clenched, in a spasmodic flare of their old battle.

"It's none of your business!" Starr flamed. "I've told you that!"

"I don't want it to be my business!" Michael flung back at her. "If I only didn't feel so damned responsible—and I know what damned foolishness that is!"

"You should worry, darling," Starr drawled in her most maddeningly disdainful accents. "Though any man might be annoyed if his brilliant brain had given birth to a mysterious Egyptian 'princess,' shall we say—and then discovered she was a nice little flame-keeper?"

"She's up!" growled Michael, glaring, and Starr obeyed by letting her musical laugh ripple out.

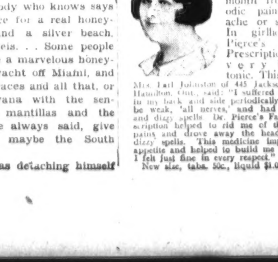

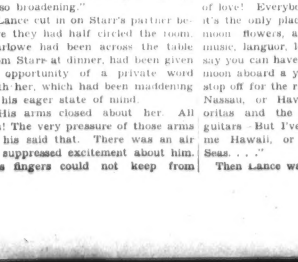

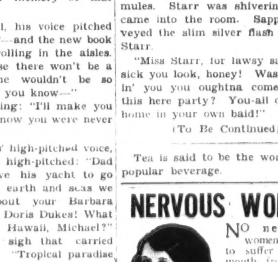

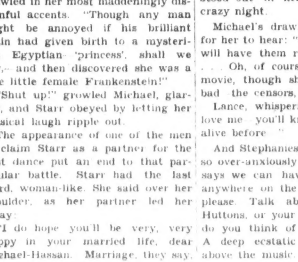

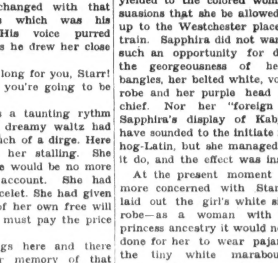

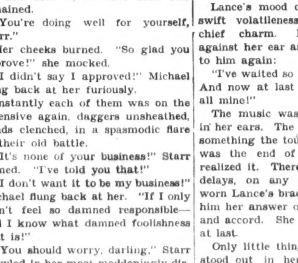

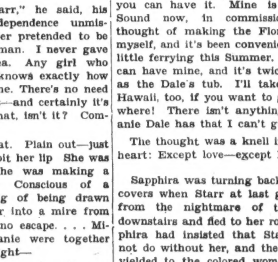

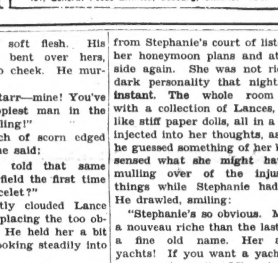

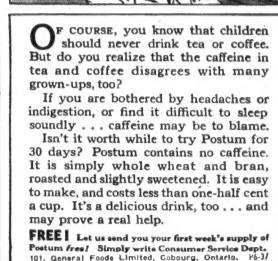

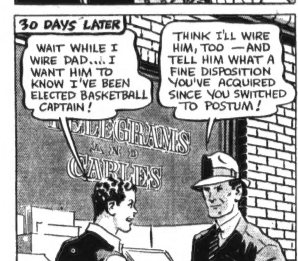

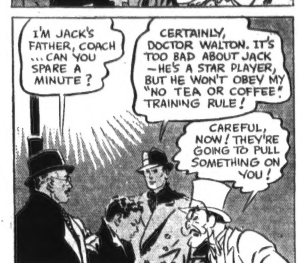

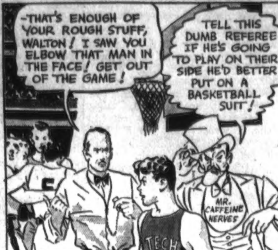

The appearance of one of the men to claim Starr as a partner for the first dance put an end to that particular battle. Starr had the last word, woman-like, she said over her shoulder, as her partner led her away:

"I do hope you'll be very, very happy in your married life, dear Michael-Husban. Marriage, they say, is so broadening."

Lance cut in on Starr's partner before they had half circled the room. Marlowe had been across the table from Starr at Westchester, and he was not a party to a private word with her, which had been maddening in his eager state of mind.

His arms closed about her. All happy the very pressure of those arms from Starr's back. There was an air of suppressed excitement about him. His fingers could not keep from

## DAD GIVES A GOOD TIP

OF COURSE, you know that children should never drink tea or coffee. But do you realize that the caffeine in green and coffee disagrees with many grown-ups, too?

If you are bothered by headaches or indigestion, or find it difficult to sleep soundly . . . caffeine may be to blame. Isn't it worth while to try Postum for 30 days? Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. It is easy to make, and costs less than one-half cent a cup. It's a delicious drink, too . . . and may prove a real help.

Free! Let us send you your first week's supply of Postum free! Simply write Consumer Service Dept., 101, General Foods Limited, Galtburg, Ontario, T-37.

descended the wide staircase. He was not near enough to speak, but Starr saw the flames of desire leap in his eyes. He understood. When this house party was over she would be cleverly she had managed to defer the wearing, or the not wearing, of that bracelet until the first night of Stephanie's party in her Westchester home.

Starr saw the bracelet immediately, too, and gave vent to a quick cry of admiration.

"Starr!" she cried—it was on Michael's advice that she had ceased calling Starr "Miss Ellison" and was calling her by her first name, as befitting a hostess to an intimate guest. "Starr! How perfectly beautiful! How utterly gorgeous! Fire opals, aren't they? Umm, rare—But do you know I've seen another just like it? That June Garfield, the dancer in the Sunnyside Revue, has one!"

Stephanie turned and called to Lance: "Remember, Lance? She used to be a friend of yours, didn't she?"

Michael did not speak, looking on as he lounged against the wall near the foot of the steps, but Starr sensed that he, too, understood the significance of that bracelet.

This was their first meeting since Starr had sent him away from her in a passion. The deep grim lines she had seen in his face then still remained.

"You're doing well for yourself, Starr."

Her cheeks burned. "So glad you approve!" she mocked.

"I didn't say I approved!" Michael flung back at her furiously.

Instantly each of them was on the defensive again, dangers unheeded, hands clenched, in a spasmodic flare of their old battle.

"It's none of your business!" Starr flamed. "I've told you that!"

"I don't want it to be my business!" Michael flung back at her. "If I only didn't feel so damned responsible—and I know what damned foolishness that is!"

"You should worry, darling," Starr drawled in her most maddeningly disdainful accents. "Though any man might be annoyed if his brilliant brain had given birth to a mysterious Egyptian 'princess,' shall we say—and then discovered she was a nice little flame-keeper?"

"She's up!" growled Michael, glaring, and Starr obeyed by letting her musical laugh ripple out.

The appearance of one of the men to claim Starr as a partner for the first dance put an end to that particular battle. Starr had the last word, woman-like, she said over her shoulder, as her partner led her away:

"I do hope you'll be very, very happy in your married life, dear Michael-Husban. Marriage, they say, is so broadening."

Lance cut in on Starr's partner before they had half circled the room. Marlowe had been across the table from Starr at Westchester, and he was not a party to a private word with her, which had been maddening in his eager state of mind.

from Stephanie's court of listeners to her honeymoon plans and at Starr's side again. She was not rid of his dark personality that night for an instant. The whole scene, danced with a collection of Lances, cut out like stiff paper dolls, all in a row. He injected into her thoughts, as though he guessed something of her longings, sensed what she might have been mulling over of the injustice of things while Stephanie had talked. He drawled, smiling:

"Stephanie's so obvious. More like a nouveau riche than the last hope of a fine old name. Her and her rackets! If you want a yacht, Starr, you can have it. Mine is in the Sound now, in commission. I'd thought of making the Florida trip myself, and it's been convenient for a little ferrying this Summer. . . . You can have mine, and it's twice as big as the Dale's boat. I'll take you to Hawaii, too, if you want to go—anywhere! There isn't anything Stephanie Dale has that I can't give you."

The thought was a knell in Starr's heart: Except love—except love!

Sapphira was turning back the bed covers when Starr at last got away from the nightmare of the party downstairs and fled to her room. Sapphira had isolated that Starr could not do without her, and the girl had yielded to the colored woman's persuasions that she be allowed to come up to the Westchester place on the train. Sapphira did not want to lose such an opportunity for displaying the gorgeousness of her silver bangles, her belted white, voluminous robe and her purple head-handkerchief. Nor her "foreign accent."

Sapphira's display of Kabyle may have sounded to the little more like hog-latin, but she managed to make it do, and the effect was inspiring.

At the present moment who was more concerned with Starr as she laid out the girl's white silk nightgown—as a woman with Egyptian princess ancestry it would never have done for her to wear pajamas—and the tiny white marabout-trimmed mules. Starr was shivering as she came into the room. Sapphira surveyed the slim silver flash that was Starr.

"Miss Starr, for lawdy sake, how sick you look, honey! Want I tell you you oughta come here on this here party? You all oughta be home in your own bed!"

(To Be Continued)

Too is said to be the world's most popular beverage.

## NERVOUS WOMEN

NO need for a doctor or a girl to suffer every month from periodic pain, headache, indigestion, or other ailments. Prescription is a very beneficial.

Miss Paul Johnston of 443 Jackson St., W. Vancouver, B. C., writes: "I would like to say that I have been very much helped by your 'Pain Expeller' medicine. I have been suffering from periodic pain, headache, indigestion, and other ailments for many years. I have tried many different medicines, but nothing has helped me until I found your 'Pain Expeller' medicine. I have now been using it for several months and I feel much better. I have no more pain, headache, indigestion, or other ailments. I feel much better and I am able to do my work and enjoy my life. I have been very much helped by your 'Pain Expeller' medicine. I have now been using it for several months and I feel much better. I have no more pain, headache, indigestion, or other ailments. I feel much better and I am able to do my work and enjoy my life."

## The World of Wheat

By H. G. L. STRANGE  
Director, "Crop Testing Plan"

### ARTICLE No. 11

Fall frosts are taking our Marquis. We need an earlier variety! This was the cry heard by Canadian plant breeders as the western wheat acreage expanded to the north immediately after the Great War. This very same appeal, it will be remembered, had been made by western farmers in 1880, when wheat acreage began to expand north and west from the Portage Plains, and when Red Fife was being caught by the frosts.

Charles Saunders in 1904 selected and tested the crosses that had previously been made by his brother Percy. Out of this work came Marquis, a variety earlier than Red Fife. Similarly, Dr. L. H. Newman—who succeeded Sir Charles in 1923 as Dominion Cereals—in turn tested the crosses that had previously been made by Charles Saunders. Out of this material, Dr. Newman selected two varieties earlier than Marquis—Garnet and Reward.

Dr. Seager Wheeler, of Rosthern, Sask., as well, selected an earlier variety, Red Bob.

Thus it will be seen how the needs of agriculture, as expressed by practical farmers, prompt plant breeders to produce more suitable varieties, which in turn tend to increase the farmers' income.

Garnet, Reward and Red Bob will be discussed in future articles.

Following factors have tended to raise prices: Advice indicate Germany concerned about securing sufficient supplies of wheat and rye; continental Europe purchases Canada

rye; spring rains still awaited in India; cattle slaughter in Uruguay for 1936 will be smaller than for 1935; Uruguay supplies about half of the canned beef imported into the United States.

Following factors have tended to lower prices: Very heavy wheat shipments from Argentina; wheat stocks on sea passage largest since March, 1933; surplus of Argentine oats for export expected to be 27 million bushels; production of soy beans, peanuts, cottonseed and sesamum in China and Manchuria materially above that of 1935.

### TAXPAYERS ACTIVE

A singular development of the past year has been the nation-wide organization of groups and associations of one form and another with the objective of some common purpose. People are now realizing more than ever before that individual protests are ineffective, individual action limited in scope and that the only possible protection is in organization and united action.

Taxpayers particularly are active in this direction because legislative trends toward higher taxes, more government regulation, constant interference with, and penalization of business. Too frequently it is overlooked by those who promote, as well as by those who enact the laws, Courts have held that a tax is not made invalid because it destroys a business. Taxation, it is claimed, is a business risk. Industry and its customers are obviously becoming alarmed that their own representatives in government cannot or do not, look after their interests—they must do it themselves.

Charles Dickens was a guest at the White House in Washington on March 15th, 1842.

## "Be It Ever So Humble"

It is to the "humble homes" of Canada that the great majority of Life Insurance payments find their way.

Many such homes today would lack the necessities of life—were it not for the "little savings" which thrifty parents have set aside periodically in Life Insurance.

To the family which loses its breadwinner, Life Insurance means money to buy food and clothing—money to pay the rent—money to pay household bills—money to educate the children. Life Insurance also

means, in many cases, independence of private charity or public relief.

In your own community, as well as in hundreds of cities and towns across Canada, "little savings" in Life Insurance are doing "big jobs". During the past six years, policyholders and beneficiaries in Canada have received, daily, from their Life Insurance Savings, half a million dollars.

"Be it ever so humble"—there's no home which cannot have the much-needed protection of Life Insurance.

## Life Insurance

Guardian of Canadian Homes

## Rimbey

RIMBEY.—A big ice skating carnival has been arranged for Feb. 4th at the Rimbey rink, with the children's skating events starting at 2:30 in the afternoon. The judging of costumes will start at 7 p.m. A full list of prizes will be provided and a large turnout is anticipated. Hot dogs and coffee will be served at the rink and music will be furnished, as usual, by electrical radio equipment, operated by Thorp Braithwaite. The carnival will be staged as an opening event of the all-weather half holiday for Rimbey.

"Danny Boy," a three-act play presented on Thursday evening, Jan. 28, in the Rimbey hall by a strong cast of talented young people from Bentley, proved a success in every way. Rev. G. A. Warren, pastor of the United Church at Bentley, played the leading role, and others of the cast were: Miss Phyllis Thorp, Miss Olive Trimble, Miss Elsie Dican, Miss Margaret Pringle, Miss Hazel Garries, Vernon Miles, Raymond Peterson, Andy Trimble, Roy Dican and Allan Hewitt. Rev. W. Race of Rimbey acted as master of ceremonies. All of the players are members of the Young People's Society at Bentley and the money raised by their efforts will be used for church purposes.

Major R. W. Hale, superintendent of postal service for northern Alberta, visited rural post offices in the vicinity of Rimbey last week.

Miss Estelle Stuart of the teaching staff of Rimbey has been ill with the flu and the primary youngsters were released from classes as a result.

Word from Mrs. D. H. Kennedy, who underwent a surgical operation in the Mayo clinic, Rochester, Minn., two weeks ago, is to the effect that she is convalescing rapidly and expects soon to return to her home in Rimbey. During her absence Mrs. Kennedy's classes were in charge of her senior pupils, Miss Elsie Dican and Miss Margaret Rimbey.

Eight tables of whist completed for honors in the third of a series of whist drives held on Monday evening at the home of Mr. and Mrs. Hayden of the Monte Vista district, north of Rimbey. The series has been sponsored by the members of the Women's Institute. The first and second whist drives were held at the home of Mr. and Mrs. Charles Smith and Mr. and Mrs. W. A. Saunders, respectively.

A play-off of winners of the three drives will be held in the Eckhart Hall, Rimbey, on Friday night, Feb. 5th, when a grand calico ball will be in progress, also sponsored by the W.I.

"Is the defendant professionally represented?" inquired the magistrate, when the case was called. The defendant piously folded his arms and looked at the ceiling. "My help comes from above," he replied, "so afraid," said the Magistrate, "you will not find many solicitors there."

## Alberta Road Program Gives Work For 400

The winter work program for single unemployed men, financed by the Dominion and provincial governments, is resulting in much highway improvement.

On the Jasper highway some 200 men have been employed. They are distributed in three camps, these being at Marlboro, Evansburg and Galloway. During the winter these camps will be devoted mainly to rock removal so that the highway should be in good shape for graveling of the various sections next spring. By next summer, at the time the tourist season hits its heaviest volume, there should be a first-class all-weather highway to Jasper.

Also of interest was the assurance given to a delegation from the Edmonton branch of the Alberta Motor Association by Hon. W. A. Fallow, Minister of Public Works, that improvements will be made this year to the bad spots on the Peace River highway in the vicinity of Lesser Slave Lake. Some 40 miles will be graded and gravelled.

In the south there are 200 men in camps on the Crow's Nest highway, completing a project which was initiated by the Dominion government when it operated relief camps for straggling men who were under the control of the Department of Defence.

Thus, it will be seen that there are hundreds of men engaged on highway construction under winter conditions, a happy augury for a big tourist season in 1937.

## Spruceville

SPRUCVILLE.—Last Thursday was a very sad day for Spruceville, when Donald Proudfoot was buried. He died, having contracted double pneumonia after suffering from flu and measles. He was one of our most promising young boys and is sincerely mourned by all. Mr. and Mrs. Proudfoot have the heartfelt sympathy of the community. Donald belonged to the Junior U.F.A., the Lacombe and District Band and the Sunday School—and all were the better for his influence.

Percy, Lawrence and Vernon Proudfoot are in bed with measles. Two new cases reported are Rosalie and Harry Southward.

Mrs. Southward has returned from the Bentley Hospital and is very much improved in health. Mrs. Jennie Whitecotton (nee Crocker) is receiving congratulations on the birth of a son, Saturday night.

Win. Barker, Archie Stout and H. E. Heath left Tuesday for Edmonton to attend the School Trustees' Annual Convention. Mrs. Heath accompanied her husband, who is motored up, the others taking the train.

Mr. and Mrs. Milton Procter are staying for a few days at the Heath home. Don't forget the dance at Spruceville on Friday, Feb. 5th, at the home of the Junior U.F.A. Robt's orchestra will supply the music.

Spruceville is a sad district. In the death of Donald Proudfoot it has lost one of its most popular and promising young boys. Mr. and Mrs. Proudfoot are in the thoughts of all of us, and they have our deepest sympathy as their great loss is our loss, too.

## Blackfalds

BLACKFALDS.—The past week has brought us the coldest weather of the winter, some thermometers reaching the 50-below mark last Thursday morning. As a result of this, and also owing to the sickness prevailing, the High School has decided to postpone its play, which was to have been presented last Friday night. It will be presented at a later date.

More cases of measles have been reported in the village, the Intermediate room being particularly affected; so far there have only been three cases in the High School room. Miss Arrowsmith, who stayed with Mrs. H. McLennan during the past week, was able to resume her duties this week.

Among others who have been under the weather were Mr. Henry McLennan, who died of a painful attack of quinsy, and Mr. Howard Long, who first got the measles, followed by an attack of pneumonia. He was in a serious condition for a time but is now making good progress toward recovery. Mrs. Moir was hit with the flu but now seems to be more like herself again.

Mr. Lawrence Martin returned last week from his trip to the Coast and reports having had an enjoyable time.

Mr. and Mrs. Ansley are receiving congratulations on the birth of a son. Francis Long has been transferred to the Innisfail branch of Singers.

Mr. Harvey Miller ("Pat" to you) returned last week from his trip to Kansas City, but was not near enough to the flood area of the U.S. to give us any account of it.

Miss Smith was a visitor in Edmonton over the week-end. Mr. Apps is still under the doctor's care. He was in Red Deer last Saturday receiving injections, and the doctor has ordered him off work for another week.

Owing to the severe weather, the W.W. have postponed their February meeting.

Despite the cold weather, the Board of Trade held a whist drive at the pool room on Wednesday night of last week. The turnout was good considering the weather and those present had a very enjoyable evening. The prize was won by: Ladies, Mrs. Walker; Gents, Bob Farewell. Consolation: Joyce Moir and Jack Plumb. Eight tables were in play.

At the annual meeting of the village, Secretary-Treasurer Warren presented one of the best financial reports heard here for years. Mr. Bills was the retiring councillor. Mr. J. Sulik also resigned. On nomination day, Monday of this week, the following were nominated to fill the two council vacancies: J. Sulik, F. Bills, Royce and Jack Plumb. Voting will take place next Monday. Edward Woolley is staying in the village with the Larsons.

## Bentley

BENTLEY.—Mr. and Mrs. Glen Wright and Mr. Wilkie traveled to Rimbey on Sunday to attend the funeral of Mr. Wilkie's father-in-law, Mr. F. W. Wilkie, of Lavetia, whose death occurred at Edmonton University Hospital following an injury received in the recent wreck on the Lacombe-Leduc branch of the G.P.R. Mrs. Wilkie and Shirley returned with them, having been with their mother, Mrs. Bachor, since Mr. Bachor's death. Mrs. Evans returned to Acme on Monday.

Mr. and Mrs. Wilkie will have the sympathy of friends here.

Mr. and Mrs. F. W. Thorp were weekend visitors in Edmonton.

Dr. W. A. Henry was an Edmonton visitor the end of last week. Born at Bentley Hospital on Friday, Jan. 29th, to Mr. and Mrs. D. McEae of Lacombe, a daughter.

Mr. Affleck, of Edmonton, who has been here for some time, conducting the pool room and barber shop, returned to Edmonton last week. Mr. Ivie Palmer purchased the business from him. Mr. Palmer has carried on a barbering business for several years and has now combined the two and is occupying the Olsen building.

### Celebrate Anniversaries

About 60 guests were present at the home of Mr. and Mrs. B. J. Parkinson at Rainy Creek on Saturday evening last, when Mr. and Mrs. Fred C. Nelson and son, Ronald, were guests of honor. Sunday was the 25th anniversary of Mr. and Mrs. Nelson's wedding day and Donald's 21st birthday.

Rev. C. W. Warren delivered a short address, presenting Mr. and Mrs. Nelson with a chest of silverware, a silver bread tray and a clock, and Ronald with a flashlight.

Mr. and Mrs. Nelson were married at the farm home of Mrs. Nelson's parents, Mr. and Mrs. J. C. Garratt, by Rev. H. B. Haddon, former pastor of the Bentley United Church. They have been members of the Rainy Creek community for about 35 years and with the large family of seven sons and two daughters have been closely identified with the school, church, social and business life.

Lunch was served during the evening. Friends of the family will wish them many more years of health and happiness.

## WESTLING

WESTLING.—A large crowd attended the dance at the Westling Hall on Friday, Jan. 29th.

Mr. Fenton Billingshurst returned home from Red Deer last Friday. Mr. Dave Mack was a Lacombe visitor Saturday.

The meeting of the Chateaufort Club, which was to be held in the home of Mrs. Axel Westling on Wednesday, was postponed to some future date.

Mr. and Mrs. Oscar Westling and Mr. and Mrs. Eddie Westling and family motored to Lacombe Saturday.

A number of cattle were shipped out of the Westling district on Saturday.

Wood sawing is prevalent in the district.

### IRISH WANT AD

The following advertisement, says the Londonderry Sentinel, appeared in an Irish newspaper:

"Lost, on Saturday last, but the loser does not know when or where, an empty sack with a ham in it. On the sack the letters M.T. are marked, but so completely worn out as to be illegible."

## St. Andrew's Church

Raises \$4,045.86

## During Year

In last week's issue of the Western Globe, a condensed report of the Annual Congregational Meeting of St. Andrew's Church was published. Below is a complete report of the proceedings.

A total amount of \$4,045.86 was raised during 1936 by St. Andrew's Church, according to reports received from the various departments at the annual congregational meeting on Wednesday evening, Jan. 27. Much pleasure was expressed that the board was able to balance the budget for the year and have a small surplus to apply on the old deficit. The total membership is now 178. Under pastoral oversight are 199 families and 58 single persons, a total of 844 persons.

With an enrollment of 178 scholars the Sunday School has raised \$184.72. Splendid reports of the Ladies' Guild show an active year on the part of their members—221 calls on sick, strangers and shut-ins; literature sent to relief areas and vegetables to dried out areas. Of the \$267.73 raised, \$100 was donated to the Board of Managers, \$100 applied on the Manse debt and \$77.73 for renovating the Church Hall.

Clothing Sent Out  
A bale of clothing sent to the Smoky Lake School Home, several hundred pounds of literature to a needy district, 200 calls on sick and strangers and \$100 raised toward Mission work was the report of the Women's Missionary Society.

The Evening Auxiliary conducted church service on Mothers' Day, raised their allocation of \$100, also donated \$125 to the board and \$17.35 to the Church Hall Fund.

C.G.I.T. groups, of which there are three, and the Mission Band, have knitted and sewn babies' garments and layettes. The former sent \$30 to the Work Board and held a Mother and Daughter banquet. The sum of \$227.50 was received toward the M. and M. Fund.

Expresses Appreciation  
In concluding his report on the activities of the board, W. Pratt, chairman, expressed much appreciation of the faithful services of the boys who had acted as ushers during the year; to Mrs. E. L. Misner, in whose home the board had frequently met, and whose resignation was regrettably accepted after many years' active service; to the C.G.I.T. groups for the excellent evening church service and impressive candle lighting ceremony conducted by them; to G. M. Laverly, the efficient chairman of the Finance Committee until his removal to Oyen necessitated his resignation; to W. C. Sweet, his successor to office; to the Ladies' Guild, who carry the full burden of the upkeep of the Church Hall; to F. J. Finlayson, who has been treasurer since the uniting of the two churches in 1922, and to the secretary, Mrs. C. E. Todd.

Heavy votes of thanks and appreciation were also extended Rev. and Mrs. Layton. Mention was made of the fact that in addition to carrying the local church work, Mr. Layton has also voiced his stand on community welfare problems. He was president of the Alberta Conference in 1935, a member of the Home Mission Board and one of the assistant secretaries at the United Church Council held at Ottawa last fall.

Tribute to Choirs  
Tribute was given to senior and junior choirs and the Sunday School superintendent, H. E. Todd, and staff.

In connection with the Church Hall Fund, the work of Mrs. W. N. Morrison and Mrs. F. D. Locke was lauded, as these ladies gave much assistance toward raising the fund. Retiring managers, H. E. Wilson,

## The Churches

CHURCH OF ENGLAND IN CANADA

Diocese of Calgary

St. Cyprian's Church, Lacombe  
Incumbent: The Rev. W. E. Herbert  
Licensed Lay Readers: E. H. Jones, R.C., and A. T. Inskip

Organist: Miss Alice Inskip  
Feb. 7—Quinquagesima.  
10:00 a.m.—Sunday School.  
11:00 a.m.—Matins.  
7:30 p.m.—Evening and sermon.

Thursday evening, Feb. 11—A service will be held at 7:30 p.m. and every Thursday evening during the season of Lent. Choir practice after the service.

Clive—Holy Communion at 11 a.m.

Tuesday evening—Scouts will meet at 7:30 p.m. in St. Cyprian's Hall.

Wednesday evening—A.Y.P.A. members will meet in the Hall at 8 p.m.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, B.D., Minister  
Services at 11:00 a.m. and 7:30 p.m.

Sunday School at 11:00 a.m.

Tuesday, Feb. 9th, 8:00 p.m.—The organization meeting of the new Board for 1937 will be held at the Manse. The wives of managers, also the elders and their wives, are invited.

Wednesday, Feb. 10th, 1:30 p.m.—The Lacombe Presbyterian will meet in the United Church, Ponoka.

Friday, Feb. 12th, 4 p.m., in the United Church—A united service, to which all denominations are invited, will meet to take part in the World Day of Prayer. Come and join in fellowship with women the wide world over in united prayer for the success of missionary work in many lands. This year the program has been compiled by Miss Mabel Shaw of Livingston Memorial School in Rhodesia, Africa.

Friday, Feb. 5th—Mission Band will meet at the home of Mrs. Arnold Braun after school.

CHRISTIAN SCIENCE

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "Spirit". The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Now we have received, not the spirit of the world, but the spirit which is of God; that we might know the things that are freely given to us of God" (1. Corinthians 2:12).

One of the correlative passages from "Science and Health" with Key to the Scriptures, by Mary Baker Eddy, is as follows (page 321): "He is all-inclusive, and is reflected by all that is real and eternal and by nothing else. He is the source of all life, truth, and individuality except as infinite Spirit or Mind. Hence all is Spirit and spiritual."

## Meadowbrook

MEADOWBROOK—A Valentine basket social will be held in the Meadowbrook School, Friday evening, Feb. 12th. The evening's entertainment will consist of a whist drive and short program. Cards and small card tables will be needed. Everybody welcome.

A very enjoyable evening was spent at Meadowbrook School last Friday, Jan. 29th. About 40 guests were present at a sleighing party and winter roast. Coffee and luns were served. All returned to their homes about midnight.

A shower and candy-pull for Mr. and Mrs. Verne Morrow will be held at the home of Mr. Harry Long on Saturday evening, Feb. 6th.

P. W. Pratt, T. Wilks, S. Edmunds, John MacDonald and Mrs. C. E. Todd were all re-elected; Mrs. A. Gilmore was elected as representing the Evening Auxiliary, and to finish the terms of C. M. Laverly and Mrs. E. L. Misner, whose resignations were accepted. T. Lett and Mrs. F. D. Locke were elected.

## Lincoln

LINCOLN—There will be a dance in Lincoln Hall on Feb. 12th. Everybody welcome. The Lacombe and District Band will furnish the music.

The next Junior U.F.A. meeting will be held at the home of Mr. and Mrs. J. Spink on Feb. 10th.

A good time was reported by the fair crowd which attended the dance in the hall last Friday. It was sponsored by the Lincoln Juniors.

We are sorry to hear that Mr. Will Wood is laid up with lumbago.

## Canadian Jr. College

Mr. D. E. Reiner and Mr. P. D. Gerrard, both of the Canadian Union Conference of Seventh-day Adventists and former residents of College Heights, paid the College a visit on Thursday, Jan. 28th. Messrs. Reiner and Gerrard now reside at Winnipeg, where the headquarters of Seventh-day Adventists for the Dominion are located.

The Lacombe Seventh-day Adventist Church, which meets for services in the College auditorium every Saturday morning, recently met for a business meeting. At this meeting it was found that during the year 1936, this church of approximately 200 members gave \$7,226.27 in free-will offerings out of their own private earnings. This money is used by the denomination for uplift and mission projects throughout Canada, the United States and every part of the world.

It is interesting to note that during the last five years the Lacombe S.D.A. church, which is only one of hundreds of churches scattered throughout the Dominion—contributed just a little less than \$40,000 to the local and foreign projects carried on by the Adventist denomination.

In addition to giving free-will offerings, a true member of this denomination considers it his duty and privilege to contribute one-tenth of all his income, which is called the tithe. The tithe of the Lacombe church during 1936 amounted to \$5,006.75, and this is in addition to the \$7,226.27 mentioned above as free-will offerings.

## Why Are Massey-Harris Tractors Leaders?

BECAUSE they have established all-time records for Fuel and Oil Economy.

BECAUSE High-Grade Material, together with advanced engineering ideas, assure long life with Low Upkeep.

BECAUSE they are Modern to the last detail.

We invite you to investigate these claims.

**Buckingham**  
FINE CUT

**Inescapable Obligations**

Responsibility to others is an obligation which none can evade or escape, and the extent to which a man is mindful of this obligation and needs it will be his progress and success in life be measured.

The statement is axiomatic whether the subject is an employee or employer, whether he conducts his own business from an office or store or whether he is working for himself on the land. There are many who think they can escape direction and avoid responsibility by going into business for themselves or by taking up land because they think it offers them "independence of others."

In the industrial world one meets young fellows who seem to think that the only fruit from their labors is what the boss gets. Either they do not know or do not care about the self-development that comes from tackling problems even where there is no immediate difference to their own pockets.

They cannot see that in performing their daily tasks they are working for the kind of business men they will be in the future. They are working for themselves, making their own careers, and being paid for it by another man or men. But so long as they remain in the wrong state of mind they will likely remain in the same station of life. Business to them will be something that is done by someone else. If they are ever in business for themselves it will be without the training that would ensure success.

Some of them do go into business. A few succeed out of sheer necessity. Some succeed for a time and particularly in times of prosperity but most of them fail in the long run because they have not accepted responsibility and have gone into business without the self-imposed training necessary to ensure success in any line. In other words they have not learned to master themselves.

Just how much is any man in business his own boss? The grocer, the bond dealer and insurance man each knows that the customer is the boss. When the employee starts out in business for himself he may learn it was easier to satisfy one employer than a hundred. He will learn that the job he has undertaken is the boss and that every job, every day, is and will be. And he will get his "boss" according to how well he pleases his "employers."

And what is true in the industrial world is equally true for the man on the land. He who thinks he is escaping responsibility to fellow men by taking up land to raise wheat or beef is making the same mistake as the man who goes into business for himself in the hope of pleasing himself and following his own dictates.

The farmer has many bosses and most of them are exacting in their demands. The consumer who eats the bread made from the wheat grown on his land and the family who consume the farmer's meat are his bosses, even though the farmer may not come into direct contact with them, and his income will be determined by the extent of his ability to cater to their tastes. When the farmer's wheat or beef is graded and priced at the elevator or the butcher, the grade and price are based on his ability to please his unseen bosses. They determine the bulkiness of his pay envelope.

And for the farmer the unseen consumer is not the only boss. There is another to whom he must look for direction and guidance and that is Dame Nature herself, perhaps the most exacting of them all. To ensure measurable success the agriculturist must not only please the thousands of more or less remote consumers whom he supplies but he must bow to the rulings of Nature as represented in her seasonal manifestations.

To be successful the man on the land has to learn to work with Nature. An attitude of antagonism or even hostility towards her laws will only create trouble for himself. He must learn to do things at the right time and in the right way whereby inclination leads in that direction or not. In other words he must be master of himself.

So there is no easy "business for oneself", either in the office or the store or the farm, an escape from responsibility. A man's problem is only beginning when he starts out for himself. More than ever before he will need the experience he has gained in the service of others, and in the case of the farmer it must necessarily be the training he has acquired from his father or his neighbor and from his own observations and deductions. Lucky for him if he has balanced that experience by learning the fundamentals of management and finance as well as production.

Capital alone will not ensure success for, as one authority said, "it is not so much what capital a man has as what he does with it."

It will take character and determination. Morale. The invisible assets that went into the founding of every business that ever became anything more than a mere way of making a living.

Without them a man weakens under the strain of satisfying a large and exacting clientele clamoring for every kind of efficiency in his product. To satisfy these legitimate demands means success. Any other course means failure.

#### Cuts Duty On Grain

##### Germany Has Made Reduction In Tariff On All Imports

Germany has cut tariffs on grain imports sharply. Foreign authorities in Berlin questioned whether the move signalled a great increase in grain purchases abroad since Germany maintains a vigorous and detailed system of control over imports.

Effective Jan. 1 the new rates amounted to reduction in duty on wheat from 94 to 12 cents a bushel, on rye from 61 to 10 cents and on barley from 52 to nine cents.

World grain markets in recent weeks have been influenced by reports Germany faced a grain shortage and would need at least 1,000,000 tons of wheat to make up for the deficiency. Accounts of German grain needs were credited with having been a spur to the spectacular rise of domestic wheat prices last month, but grain men have realized that Germany, with a small gold supply and scant holdings of foreign exchange might find it difficult to fill its wants in the world market.

Chrysanthemums are named from two Greek words meaning gold and flower. They are natives of China as far back as Confucius, but have been largely developed by florists of Europe and America.

The Queen Mary, new British liner, is really two ships, one within the other, with a space of six feet between the outer and inner hulls.

#### New Electrical Rays

##### Italian Invention Makes Man Invisible By Use Of This Apparatus

Engineer Mario Mancini of Milan, Italy, was reported ready to offer the world an electro-optical apparatus which makes man invisible while under its rays.

Prof. Mancini's machine was described as an electrical device whose levers regulate the intensity and frequency of electrical current in order to obtain its rays.

Newspaper reports are that the apparatus, the result of years of work, has been patented.

While X-rays render invisible only the softer parts of the body, the Mancini rays are reported to penetrate every part. It is asserted that in tests at the professor's home persons subjected to the rays were invisible, while the chairs in which they sat could be seen. Few substances, it was added, are able to stop the rays.

Informants asserted that persons subjected to the rays first assume a confused appearance, then become ghost-like and finally become invisible.

The Bible has been reprinted more than any other book. Each of the early printers inaugurated his career by running off a few copies of the Bible, as if to insure success in his future publications.

There are 64 streets, squares, etc. in London named "Albert," in honor of Queen Victoria's husband.

#### Food Prices Rising

##### Rising Food Prices Are Hard On The Consumer

The problem of the family budget is again disturbing the peace of mind of the thrifty Canadian housewife and her husband who has to provide the wherewithal to meet the needs of the family. The centre of attention is food prices.

After a spell of fairly stable prices, the movement for some time has been upward and the cost of a budget of the leading foods that are consumed by the Canadian has risen about six per cent, in the past six months. This figure represents the average for 70 Canadian cities; it would be higher in some and lower in others.

The sharpest price advances have been made for potatoes, eggs, butter, flour and fresh pork. Of course, eggs and butter are usually higher in the fall but other increases are not to be explained by seasonal influences. Most of the other common foods have also moved upward by moderate amounts, the only noteworthy exceptions being fresh beef, lard, milk, coffee and sugar.

Food prices generally are now almost 25 per cent. higher than the 1933 depression low point, but are still 25 per cent. below the pre-depression levels of 1929.

Rising food prices are a hardship on the consumer but are a boon to the producer. The farmer was hard hit in the depression and a distressed farming community reacts on the prosperity of all other classes in the Dominion. Prosperity on farms would lead to more general prosperity and higher incomes to meet the higher costs of living. So even the cloud of higher food costs which hangs over us may have a silver lining.—From the Internal Trade Branch of the Dominion Bureau of Statistics, Department of Trade and Commerce.

#### Japan Short Of Oil

##### Has Plan For Production Of 1,500,000 Tons From Coal

The Japanese army and navy have come forward with programs calling for the creation of a 1,500,000-ton company to produce 1,500,000 tons of oil a year from coal during the next five years.

The coal from which this oil is to be squeezed is expected to be obtained from mines in Japan and territories under Japanese influence or control.

While it produces both oil and coal, Japan proper does not possess either of these minerals in sufficient quantity of such quality as to meet its actual or potential needs in peace or war.

And that is why it was anxious to secure in Manchuria a dependable supply of coal and oil-bearing shale.

The economic interpretation of history finds strong support in the efforts of underprivileged Japan to make itself economically independent of other powers, which might try to starve it into submission.

At the same time Japan's desperate efforts to make itself economically independent reveal the disadvantage under which it would now enter upon a prolonged war with the Soviet Union, say, which still has under its top-most layers of the earth coal, oil and other essential minerals.—Detroit Free Press.

#### Would Protect Canada

##### Lethbridge Member Will Support Any Program For Increased Defence

John H. Blackmore, of Lethbridge, Social Credit leader in the House of Commons, said that he would strongly support the King government in any program of enlarged defence.

"Canada in my opinion should be spending as much per capita on defence as Great Britain and the United States," he said. "This Dominion is jointly responsible with all parts of the British Commonwealth for its defence and we are jointly responsible with the United States for the protection of the North American continent."

Mr. Blackmore said air defence is the important feature Canada should emphasize.

#### Were Well Trained

A commercial traveller, visiting a large business office, jokingly boasted to the manager that he could pick out all the married men among the employees. He was challenged, and so he proceeded to demonstrate.

He stationed himself at the door as the employees returned from the noon luncheon hour, and designed those whom he believed to be married. In almost every instance he proved to be right.

"How do you know?" asked the manager in amazement, after the experiment.

The answer was simple. "The married men wipe their shoes on the mat; the single men don't."

#### There Are Others

The Peterborough Examiner says the fact that Dr. A. P. Coleman, professor emeritus of the University of Toronto, has been awarded the 1934 Penrose Medal of the Geological Society of America, will help to advertise the fact that Mounted Police and professional hockey players are not the only kind of folk produced in Canada.

All except a few types of birds adhere to their original mates for years, or a lifetime, 2186

#### WAKE UP YOUR LIVER BILE—

##### And You'll Jump Out of Bed in the Morning

The liver should secrete out two pounds of bile into your bowels daily. If the bile is not flowing freely, your food will digest. It just stays in the bowels. The bile goes into your stomach, and is converted. If the bile is not flowing, you will feel sick and the world looks gray.

At once, take a small dose of Dr. Williams' Pink Pills to get this bile flowing. You will feel better and the world looks gray.

#### New Realm Of Radiation

##### Professor Einstein Develops New Theory In Support Of Relativity

The New York Herald-Tribune says Prof. Albert Einstein has discovered a whole new realm of radiation, more extensive in range than known radiation types like light, heat and sound, giving further support to his theory of relativity.

The newspaper says the scientist and his assistant, Dr. N. Rosen, furnish mathematical proof of the existence of this realm in a paper to be published in the Journal of the Franklin Institute of Philadelphia.

The radiation visualized in Einstein's mathematical concept, the Herald-Tribune says, is made up of gravitational waves which parallel electro-magnetic waves in size and frequency but have different properties.

The only one of these properties as yet demonstrated, the paper continues, is the ability to pull comets and planets out of their courses as they move around the sun.

Neither scientist, the newspaper said, was available for amplification of the announcement of the discovery because Dr. Rosen is in Russia and Dr. Einstein requested that his period of mourning for his wife, who died Dec. 20, be respected.

#### Canadian Quota Not Filled

##### Shipments Of Dairy Cows And Cream To U.S. Were Small

Quotas on cattle, calves and seed potatoes under the Canada-United States trade agreement were exhausted prior to Nov. 30, but quotas on dairy cows and cream were far from exhausted.

Under the treaty, reductions in duty were granted by the United States subject to quota limitations on imports. The department of trade and commerce released an official statement based on records of the United States government showing Canadian exports of the products subject to quota.

On dairy cows a quota was fixed of 20,000 head and the duty reduction was 50 per cent. Up to Nov. 28, Canada had shipped 17,780 head or 88.9 per cent. of the quota.

Shipments of cream under the reduced duty were small. The duty was 1,600,000 gallons and the quota reduction from 55 to 10 per gallon to 35 cents. Up to the end of November Canadian shipments amounted to 35,194 gallons.

#### May Receive Fortune

##### Stone Cutter In France May Be Heir To Fortune In America

The six-year struggle for the legal heirs of the \$20,000,000 tobacco fortune of the late Mrs. Henrietta E. Garrett, widow of Walter Garrett, of Philadelphia, was believed near its end with the discovery in Nancy, France, of a stonecutter named Murs, who is a fourth cousin. He is about 60. His wife is living, and they have a 25-year-old son.

When informed the family might receive a large part of the Garrett fortune, estimated at \$20,000,000 francs (\$24,800,000 with accumulated earnings, M. Murs said in that case they would devote most of it to alleviating distress.

M. Murs declared he would not leave his job as stonecutter as he still enjoys the work.

#### Relics Of Pompeii

##### Skeletons Of Sixteen Victims Have Been Recently Unearthed

Skeletons of 16 victims of the destruction of Pompeii in 79 A.D. were unearthed recently, lying where apparently they fell while striving to flee the erupting volcano Mt. Vesuvius.

Two of the skeletons were those of children. Personal possessions of the victims, strewn nearby, included two bags of gold, silver and bronze coins; metal bracelets and pins in a jewel casket.

Money For Education "More pigs, less illiteracy," was the parting advice of a Chinese inspector as he boarded a steamer for the national capital. In explanation he pointed out that Hupeh province has a 20 cent tax on every pig marketed, the proceeds going toward mass education.

Chinese drama is said to have begun during the reign of Emperor Yuen-Taung, in 720 A.D.

#### Money For Education

"More pigs, less illiteracy," was the parting advice of a Chinese inspector as he boarded a steamer for the national capital. In explanation he pointed out that Hupeh province has a 20 cent tax on every pig marketed, the proceeds going toward mass education.

#### An Eskimo Artist

Far up in the frigid reaches of Alaska, Tivak, a 25-year-old Eskimo, has turned from the usual native occupations of fishing and hunting to become the only professional artist in the Arctic circle. Rockwell Kent, illustrator and explorer, made known in New York.

While there have been thirty-two occupants of the White House since the nation's birth, only eleven men have served as Chief Justice of the United States.

Speaking without thinking is like shooting without aiming.

A duck can breathe through a broken wingbone.

The hummingbird is the swiftest of all birds for short flights.

#### Storage Of Ice

##### Simple Matter To Store Ice For Use In The Summer Months

Where ice is readily available, the storage of a few blocks of it is a very simple matter. Any unoccupied corner of a shed will serve the purpose. A rough board enclosure, ten feet square and eight feet high, staves the Dominion Department of Agriculture pamphlet, "Simple Methods for the Storage of Ice," will hold enough ice to provide 50 pounds per day for 130 days, after allowing for a reasonable amount of wastage. The smaller the quantity stored, the larger is the proportion of waste.

The bottom of the enclosure should be covered with about one foot of sawdust. If the soil underneath is impervious clay, it will be all the better if there is a few inches of gravel under the sawdust. In putting the ice in the enclosure, the boards can be taken away from one side and replaced after the ice is in position.

The space of one foot, to be filled with sawdust, should be left between the ice and the boards; and the ice should be covered with about the same thickness of sawdust. It is the sawdust which keeps the ice from melting.

The drier the sawdust, the better the ice will keep, and it is a good plan to throw out the driest of the sawdust from time to time as the ice is being removed during the summer. Under cover this sawdust will continue to dry out and thus be in a better condition to be used again in the following year. Several plans and specifications for icehouses, including an icecellar, are given in the pamphlet, which may be obtained on request from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

#### Covoring Sea Serpents

##### Are Nothing More Than King-Herring, Says Expert

An explanation for Cadorborasaurus, the covoring sea serpent of British Columbia, and all other sea serpents, was put forward by Percy Barnhart, curator of the biological collection at the Scripps Institution of Oceanography, at La Jolla, California. He claims the sea serpents are nothing more than common king-herring.

The king-herring is a long, ribbon-like fish that lives in the deep sea. The body is very slender and of great size, sometimes reaching a length of 20 or 30 feet. Its sinuous, snake-like motion while swimming makes it an excellent double for the traditional sea serpent, as does its head, which is adorned by a bony crest. The body is fragile, resembling jelly, and its bones are very light and thin.

#### Should Have Special Dress

##### To Distinguish Women Members Of Parliament At Coronation

Members of parliament and their wives are still in doubt as to how to dress for the coronation. The earl marshal has so far issued no instructions. The wives of members of parliament are most likely to follow the example of their predecessors at the last coronation, and wear evening or court dress, without trains.

At the coronation of King George and Queen Mary there were no women M.P.'s. Another opinion is that it would meet the case for them to wear some sort of insignia with their evening or court dress.

#### Answer This One

A Milwaukee jeweler suggests that a badge be given a person when he pays his taxes. In a way, the idea has merit, but after a taxpayer paid his taxes, what would he have left to pin the badge to, asks the Washington Post.

The giant model of the moon at Griffiths observatory, Los Angeles, was built by Roger Hayward, and conforms to exact scale with photographs taken with the 100-inch telescope at Mount Wilson.

He: "Do you know much about flowers?" The Lady: "I used to, but I have forgotten them all except the aurora borealis and the delirium tremens."

Benjamin Franklin printed the first Masonic book in America in 1734.

#### Now Ease Neuritis Pains Fast

##### "Aspirin" Tablets Dissolve Almost Instantly

In 2 seconds or less, an "Aspirin" tablet starts to dissolve and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is dissolving. What happens in the glass happens in your stomach.

#### For Amazingly Quick Relief Get "ASPIRIN"

If you suffer from pains of neuritis what you want is quick relief. "Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus it is ready to start working almost instantly—your headaches, neuralgia and neuritis pains start easing almost at once.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

#### Demand and Get—ASPIRIN

#### Rebellion Veteran

##### William Dow Served As Dispatch Rider In The Struggle Of 1885

A veteran of two Canadian armed conflicts, and a pioneer of the west, William Dow, aged 87, of Ruidell, Sask., died in a Saskatoon hospital recently.

Dow served as a dispatch rider during the rebellion of 1885, and was captured by Louis Riel. He succeeded in escaping, and was fully conversant with the rebel leader, however, and later escaped. In 1887, he participated in the Fenian raids.

Born at Whitby, Ont., Mr. Dow moved to western Canada in 1869, and worked on the first government survey in Manitoba that year. Following the Riel rebellion, he returned to Manitoba, settling at Pilot Mound in 1889.

In 1904, the pioneer followed new trails to Saskatchewan, and took a homestead near Lillac, where he farmed until recently.

#### Alberta Scholarships

##### Established To Encourage Agricultural Education Among Farm Boys And Girls

Established to encourage agricultural education among farm boys and girls, 20 scholarships will be available to young people in Alberta, Hon. W. N. Chant, minister of agriculture, announced.

The scholarships, entitling winners to attend one of the provincial agricultural schools, or the agricultural faculty of the University of Alberta, will be financed by surplus funds obtained from the defunct Canada wheat board.

The hop-merchant butterfly lays its eggs in columns which are attached to leaves. The last laid eggs hatch first so that the chain remains unbroken.

"You're not looking too 'appy, Mrs. Higgs."

"No—it's this uncertain weather. One day it's hot, next it's chilly, and yet never knows what to pawn."

The more style some folks put on the more creditors they put off.

## Education Concerning Wild Life Conservation Stressed At Conference

As conservers of game, Indian trappers rank high compared with their white competitors in the opinion of game experts who attended the provincial-Dominion wild life conference at Ottawa. Delegates paid tribute to the Indians and complained of the destructive habits of white men.

The matter came up in the course of a discussion on the possibility of working out some system of regulating trap lines, under which a trapper could establish a proprietary right to a certain area and keep other trappers off.

It turned out the Indians in certain districts had settled the problem in their own informal fashion. They had evolved a system under which certain areas were the recognized trapping preserves of certain families and invaders were dealt with in effective, if rough, fashion by the trappers.

The conference was called by H. T. A. Cramer, minister of mines and resources, who, in addressing the opening session, said the \$805,000 paid out in relief for Indians last year was closely related to the depletion of fur-bearing animals and the difficulties of making a living by trapping.

Numerous resolutions on a wide range of subjects relating to wild life conservation were passed. These will be submitted to Mr. Cramer for his consideration.

A plea was presented for predatory animals and birds on the ground they are necessary to maintain a natural balance, and when destroyed the animals and birds supposed to be protected suffer deterioration. This view was sharply challenged, particularly with respect to timber wolves and their effect on the deer population.

Need for better education of children concerning wild life conservation was stressed. An entirely new point of view with respect to wild animals and birds should, it was urged, be presented to children in the schools.

The number of wild duck in Canada was now placed at the lowest level in history and it was suggested absolutely closed seasons may be necessary to protect them.

The present situation was attributed to drought, settlement, over-shooting and ill-advised drainage of swamp lands which had deprived waterfowl of their natural haunts and made no proportionate contribution to agricultural production.

It was expected creation of artificial reservoirs as a measure of drought-resistance and preservation of existing natural breeding places might to some extent repair the damage in this connection.

**Building Should Be Active**  
Better Conditions Expected To Revive Industry In Canada  
In 1935 the expenditure on all kinds of building in Canada was \$160,000,000. In 1929, the construction bill was \$278,000,000. It will be seen, from these figures that the country is lagging badly in the matter of revival in building industry. How, those who study the why and the wherefore of industrial operations are of the opinion that building is going to be very active in Canada shortly. They fear that the revival will come so suddenly that preparation for it will be poor and we will experience an undesirable boom, with materials scarce and high-priced.

One of the conditions that stimulate building activity is prosperity on the farms. The West is now selling its surplus wheat at the best price for seven years. The products of eastern Canadian farms are more easily disposed of at higher prices. It would seem that prosperity is coming back to agriculture. When this happens, it is usually the case that there is activity in building.

There is an actual shortage of residences in the greater part of Canada—Galt Reporter.

**Also An Offense**  
Overturned Drivers Should Not Try To Operate A Car

A Hamilton magistrate fined an automobile driver \$50 and costs for driving a car when overturned. Three drivers have no more business driving an automobile than intoxicated ones in the opinion of the Hamilton magistrate, and he is right. Driving while intoxicated is not an offense because traffic laws are interested in the evils of intoxication, but because the motorist who drinks and drives is incapacitated and incapacitation from any other cause, fatigue for example, is also an offense—Arthur Enterprise-News.

**Mrs. Black:** "We really must get a new car John."  
**Mr. Black:** "What—when we're still paying instalments on the car I exchanged for the car I sold in part payment for this?"

France governs 360 of every 1,000 square miles in Africa to-day. Great Britain is next with 348, Belgium with 181, Portugal 99, Italy 59, and Egypt 31.

Soap, dropped into a geyser, causes it to erupt.

### Facts About Flax

#### One Type Cultivated For Fibre And Other Type For Seed

Two types of flax are produced in Canada. One type is cultivated for the production of fibre as used in the manufacture of linen; the other type is grown for the production of flaxseed from which linseed oil is extracted. The flax plant is the source of both these types which are cultivated according to whether the seed or the fibre is the principal product desired. Fibre flax has longer straw and fewer branches and is more suited to moist climates. It is grown chiefly for fibre in Ontario and Quebec.

The seed flax type has shorter straw, branches freely, and is more suited to a moderately dry sunny climate. Taking Canada as a whole, from 90 to 95 per cent of the flax produced is grown for seed production and is localized in the central part of Saskatchewan, although flax is grown successfully over a wide area. With regard to seed production, the information is contained in the "flax" bulletin under the title of "The Production of Flaxseed in Canada," written by W. G. McGregor of the Cereal Division, Experimental Farms Branch, Dominion Department of Agriculture, and obtainable free on request from the Publicity and Extension Branch of the Department at Ottawa.

The extraction of linseed oil, states the Bulletin, is not a complicated process. The seed is ground to a fine meal in steel roller mills. The ground meal is then heated with live steam, after which it is subjected to increasing pressure in hydraulic presses for about an hour. The oil is thus squeezed from the cells. In commercial crushing, about 10 pounds or 2½ gallons of oil are obtained from a bushel (56 pounds) of seed. The quantity and quality of the oil are influenced by climatic conditions, especially by temperature and rainfall. From a survey of the flaxseed produced in the Prairie Provinces, it has been shown that oil of higher quality is produced in the park or northern zone and the irrigated districts of Alberta.

An excellent quality of flaxseed for all purposes is grown in the Dominion. The principal consumer being the linseed oil manufacturer who produces two commercial flaxseed products, namely: linseed oil and linseed meal. At present eight mills in Canada use flax, three of them being located at Montreal; one at Toronto and one at Baden, Ont.; one at Winnipeg, and one at St. Boniface, Man.; and one at Medicine Hat, Alta.

#### An Age-Old Tradition

##### New Year Levees Were Once Very Formal Affairs

In Ottawa, as well as in each of the provincial capitals, the King's representatives held levees on New Year's Day. Lord Tweedsmuir received in the Hall of Fame, Parliament Buildings, Ottawa, while the provincial lieutenant-governors for the most part held their functions at their various official residences.

Unlike the formal receptions which usually feature the opening of Parliament or Legislative Assemblies, the New Year's Day levees are thoroughly domestic and the guests their roots away back in the early history of Canada. Like many democratic institutions their origin lies in the French tradition.

The levee was an occasion in the days of the French regime in Canada, when the Governor of New France met the citizens, with all the trappings of class and caste shrouded for the time being. In storied Quebec the Governor kept open house for aristocrat and proletarian, and, standing outside the old Chateau St. Louis, he greeted and shook hands with peers and paupers, with administrators, bishops, soldiers, trappers, voyageurs, farmers, shopkeepers and courtiers de bois.

When it snowed, as, according to the late Rudyard Kipling, it occasionally does in Quebec, their Excellencies held their levees indoors. This age-old tradition has persisted in Canada, and on New Year's Day it was repeated in Ottawa. Although morning dress by "civilians" and uniforms by members of the armed forces are usually worn, this formal dress is far from being required in Ottawa. Citizens in sack suits receive from His Excellency the same cordial reception as those in more conventional attire.

The outflow of fresh water from the Amazon river into the ocean is more than 1,000,000 cubic feet a second. This fresh water is found in the ocean more than 200 miles from shore.

**Solicitor:** "In that case you may have grounds for a separation? When did your husband desert you?"  
**Client:** "Last night. I stopped to look in a milliner's window—and he walked out."

North America contains 22,000 pure-blooded blons. 2186

### Immigration Question

Pressure Is Being Brought On The Government To Open The Doors

Pressure on the government to open the doors for immigration grows daily, it is learned, argument is being advanced sufficient prosperity has returned to warrant allowing more settlers to enter the Dominion.

Before the war Canada was a most aggressive country in endeavoring to settle its vacant lands with families from United States and Europe. In the top year, 1915-16, immigration totalled 322,540. The biggest year since the war was 1928-29 when 187,723 migrants came in. This flow has been reduced to a trickle. Last year it was 11,103.

Recently newspapers have called for a change in policy. In his new year message Mr. Edward Beatty, president of the Canadian Pacific Railway, said "the time has come when renewed attention should be given to the all-important matter of immigration."

In a speech in London, Conservative Leader Bennett suggested moving people from the congested British Isles to sparsely settled Dominions.

Canada with its 11,000,000 population holding half a continent, rich in natural resources, should not continue indefinitely its present policy of exclusion, is an argument advanced for opening the doors. Many problems might be alleviated by a greater population.

The present Liberal government has taken the position, as did the Conservative government preceding it, that it would be folly to bring in new settlers when there was no work for thousands of people already here. Even if immigrants were farmers, farmers now on the land were producing more than they could sell at profitable prices.

Things are changing, however. The oppressive wheat surplus will be wiped out by the end of the present crop year. Other surpluses have disappeared and Canada has been unable to take full advantage of outside markets for several farm products owing to lack of supplies. Thus one argument against immigration has weakened.

Not only has Canada been getting few new citizens from abroad but there has been a considerable flow of mechanics from the Dominion to the United Kingdom, presumably to take up munitions plants. One ship out of Montreal last fall carried almost 600 mechanics.

This flow of expert workmen out of the country has been coupled with the failure to appreciate young trades leaders because there was not sufficient work for those already trained. Men in close touch with the situation say any considerable advance in economic recovery will find a shortage of skilled workmen.

### Based On Old Law

Nova Scotia Police Officials Convicted Under 500-Year-Old Statute

Basing his decision on a statute passed in 1381—during the reign of Richard I of England—Judge Neil R. MacKay, convicting five to six Sydney officials of forcible entry and imposed fines of one dollar each or one day in jail.

Convicted of the charge, preferred by Charles Rowe, former Sydney policeman, were Chief of Police W. R. Tracey, Police Constables M. E. MacDonald and H. G. MacDonald, and two carpenters, George Whent and Duncan MacKay. A similar charge against Chief Magistrate Mayor S. E. Muggah had previously been dismissed by a grand jury.

Justice MacArthur, in his six-page decision, found the Rowe family had moved into a house in 1934 on the death of the grandmother of Mr. Rowe, former lessee from the Admiralty. The city claimed title to the property, and when the family would not move out, sent Chief Tracey and the constables and possession was acquired by the city in this way, instead of by action under the Overriding Tenants Act, the Judge found.

Chief of Police W. R. Tracey is well-known in Saskatchewan. He was assistant commissioner of the provincial police force some years ago.

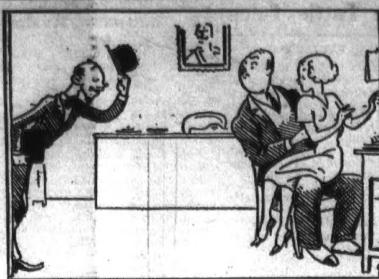

### Would Adopt New Ink

Berlin Authorities Want To Reach Newspapers To Use Again

Efforts are being made by Berlin authorities to have the German printing trade adopt a new ink that can be bleached so that the paper of old periodicals and newspapers can be used again. For years chemists have been seeking a process by which present lamplight inks could be removed from paper. Unsuccessful in these experiments, the chemists have compounded an ink that bleaches readily when treated with small quantities of sulphur dioxide. The new ink pigment is made from crude manganese dioxide and is known as "Manganschwärze." In government circles it is believed the ink will become popular eventually.

### Has Fine Quality Brain

Mayfair's phenologist had achieved great popularity when the Duke of Kent, youngest brother of the King, was photographed as he emerged from a phenologist's shop. The phenologist told the Duke he had a "very fine quality brain, and was very fastidious, sensitive and critical."

"Good morning, sir. I should like, if I may, to demonstrate a machine that will enable you to dispense with typists."—Guerin Meschino, Milan.

### Service Has Expanded

#### Year-End Survey Shows Canada Has 13,284 Post Offices

Canada's postal services have been substantially expanded and improved in the past 14 months, a year-end departmental survey shows.

In the 14 months, 223 new post offices have been established, distributed by provinces as follows: Nova Scotia, six; New Brunswick, 14; Quebec, 79; Ontario, 63; Manitoba, nine; Saskatchewan 20; Alberta, 17, and British Columbia, 16.

This brings the total number of post offices in Canada to 12,264, of which only 133 are operated by salaried postmasters, the rest working on a commission basis. The commission is 70 per cent on the first \$1,000, 30 per cent on to \$10,000, and 20 per cent from there up. Postmasters on commission pay their own assistants and provide quarters for the offices.

There is, however, a rental allowance and, where the mail is "worked" at night, also a forwarding allowance. In the case of several hundred of the smaller post offices, the postmasters' only remuneration is the \$100 minimum paid by the department when there postage receipts do not amount to that.

In the country districts, 127 new rural delivery routes have been authorized in 14 months, of which 58 have actually been put into operation serving about 4,000 homes. The 100 new routes will be undertaken as soon as the necessary boxes have been erected, nine routes being already scheduled for inauguration early in January.

### Estate Being Kept Up

#### King George Will Decide Fate Of Fort Belvedere

Fort Belvedere, the Duke of Windsor's favorite residence as Prince of Wales and king, has been completely cleared of furniture and effects. It will remain empty, it is understood, until King George decides its future.

Linen, plate and such things have been stored at Windsor castle until the duke requires them. The Belvedere estate is being kept up perfectly, and it is believed will go to a member of the royal family or a personal friend of the new king.

Meanwhile, preparations are proceeding at Buckingham palace to provide a suite for the king and his family who are still resident at 145 Piccadilly. A moving date has not been fixed.

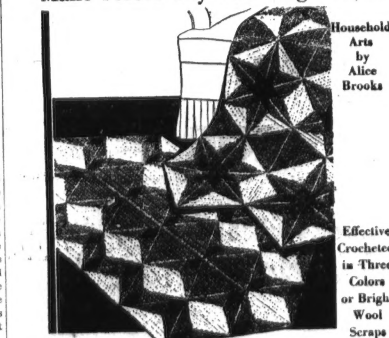

### May Have Chair

As heir-presumptive to the Throne, Little Princess Elizabeth will be even more in the public limelight than has been in the past. It is being wondered in many quarters whether she will be one of the central figures when her father and mother go as King and Queen to open in state the next session of Parliament.

The Prince of Wales, as heir-apparent, always had a special chair in the House of Lords. Will the Princess occupy that chair?—Glasgow Bulletin.

A family with an income of \$3,000 a year is Big Stuff in Japan.

### Make Floors Gay with Rug Crochet

PATTERN 5783

Brighten your floor—the foundation of your room's charm—with this quick crocheted rug, then do a fetching pillow or afghan to match! By arranging the simple 7-inch triangle, basic design of these sparkling rugs, in various ways totally different designs result. You'll win a reputation as a rug-maker if you do. Send for this set from rug yarn, rug or colorful tapestry. Send to-day for the pattern! In pattern 5783 you will find complete instructions and charts for making the triangle and joining it to form various designs, an illustration of it and of the stitches used; the material requirements; color suggestions.

To obtain this pattern send 30 cents in stamps or coin (please preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott St., Winnipeg.

There is no Alice Brooks pattern book published

## Some Of The Principles That Are Of Importance In The Art Of Healthy Living

### Gaining In Popularity

#### Rapid Advancement Made In System Of Hog Raising

Rail or carcass grading of hogs, which is purely voluntary on the part of producers, is rapidly gaining in popularity in Canada. Rail grading has been in operation in Ontario, Quebec, and the Maritime provinces since 1935, and was introduced in the prairie provinces during the present year. The system has made rapid advancement; to date more than 30,000 hogs have been sold under it in the prairie provinces alone. During the first forty weeks of 1935 approximately 71,000 hogs were rail graded and during the corresponding period of 1936 over 240,000 hogs were consigned for sale under this method by farmers in the prairie provinces, Ontario, Quebec and the Maritime.

Live hog grading, which was introduced ten years ago, is now being supplemented by rail grading as the second step leading further towards the general production of a type and quality of hog which will produce bacon to compete successfully with foreign bacon in the British market and at the same time stimulate consumption at home.

The marketing of hogs on a dressed-weight rail-graded basis, commonly called rail or carcass grading, is exactly what the hogs imply. When the farmer delivers his hogs, they are tattooed with a number for identification after they are killed. The live hogs are first weighed so that a part down payment may be made, which usually runs about 75 per cent. of the butcher price. The hogs are then slaughtered and weighed individually to the exact pound. An inspector of the live stock branch of the Dominion department of agriculture then grades the hogs on the killing floor, and the final payment is made on the basis of that grade.

### Latest Type Dairy Barn

#### Building Designed To Provide Hygienic Production Of Milk

G. Sherman Haxton of Oakfield, is supervising the construction of what he describes as the largest dairy barn in New York State.

Built of tile, the barn when completed in April will provide accommodations for 500 cows with a floor space of 38,000 square feet. "I can tell you how much it will cost," Haxton, a Rochester and Oakfield businessman, said.

The building is designed not only to make the life of "bossey" one of comparative luxury and ease, but to provide for the hygienic production of milk.

The cows will be made comfortable in all seasons through a system of forced ventilation and heating. The milk will be drawn from the cow by a vacuum system directly into a storage tank and from there through the pasteurizing unit into the bottles. No air or hands will touch the milk before it is bottled, Haxton said.

### One Way To Check

#### Florida Winter Resorts Judge Business By Garbage Test

In the large winter resorts of Florida the garbage is bigger and better this winter. This, of course, can mean only one thing—the depression is over. In Florida the tourist agencies, hotels, and transportation companies pay no attention to government statistics, to the stock market, or the views of economists. They keep check on the visitors' garbage. They know down to the last grapefruit skin how much garbage is collected at Miami every day and they make their plans accordingly. If the garbage increases, they plan for a large season. If the garbage declines, as it did alarmingly a few years ago, they cut wages and reduce staffs. It all depends on garbage, the one indisputable economic thermometer.

You will be glad to know, therefore, that garbage is well up this year over last year and several camps above the 1929 low.—B.H., in Victoria Times.

### Should Take Their Time

Strenuous persons who jump out of bed as soon as they wake are impairing their health, the French Academy of Medicine was told. Dr. Maurice Augustus Boileau said it was necessary to remain in bed 20 minutes after waking so the blood circulation, which slows up during sleep, can return to normal.

### Mineral Development

Considerable progress was made in mineral development in Saskatchewan during the year just ended and even greater advancement is anticipated for 1937. At the close of 1936 approximately 1,600 claims in the Lake Athabasca area were recorded as being in good standing.

### The World's Hottest Spot Is Said To Be A Province Named Ladak In Kashmir, India.

On a real boiling day the temperature climbs to 160 degrees.

Florida has 19,800,000 acres of swamps and wet lands.

### Times Have Changed

#### Pride In Country Not As Marked In Younger Scotsmen

Scots all over the world will be called upon to express their disapproval of £3,000 needed to restore the grave at Dumfries of their national poet, Robert Burns, only £480 has been subscribed. It may be that the canny younger generation is impatient of such expenditure upon a mausoleum.

Not many years ago a young Chinese came to London after taking a course in engineering at Edinburgh University. Being a cultured and very likeable fellow, he made a number of friends in the university, and when the time came for him to go all these young Scots came to the station and gave him a great send-off. Each brought a parting gift, and he described how the compartment seemed littered with mail.

After the train started he began to undo his parcels. To his astonishment, with a few exceptions each contained the poem, in one volume, of Robert Burns' Overseas Daily Mail.

Menagerie Man: "Madam, please keep your children away from the bear cage."

Woman: "You don't think my children would hurt the bear do you?"

Menagerie Man: "No, but this bear ain't choiced to death on a knife in the pocket of the last boy he ate."

The Silver Jubilee express, Britain's fastest train, earns 12s profit for every mile she covers, according to figures published by the L.N.E.R. She costs £24 a mile to run, and earns, on the average 16s 2d a mile.

### Unless progress is made in the prevention of mental illness, it can be predicted that four children out of every hundred born in Canada, will at some period of their lives be admitted to mental institutions as patients, writes Dr. C. M. Hincks, director of the Canadian National Committee for Mental Hygiene, in the current issue of "Health," organ of the Health League of Canada.

Fifty per cent of mental disorders can be prevented, Dr. Hincks asserts, in his stimulating article, highlights of which follow:

"In the first place, what are some of the principles that are of importance in the art of healthy living?"

"One of our fundamental needs in this connection is work. It is interesting to note that the surest way of preventing mental deterioration among mental hospital patients is work or occupational therapy.

"New work to be of full value must make a pull upon imagination and initiative. It should not be characterized by monotony and drudgery. It should give us the satisfaction of worthy endeavor and achievement. In other words, it should be a morale builder, giving us healthy ego satisfaction.

"We are indeed fortunate if in our forties, fifties and sixties we still know how to play. It is a habit to which we should cling from our youth.

"Yes, recreation keeps us young, and, in supplying our need for recreation, avocations and hobbies may be priceless. We all recall instances where an avocation has completely changed the life of an individual.

"We all need intimates with whom we can share our joys and sorrows, our ambitions and successes, because the sharing of an experience with another multiplies its value ten fold. Another aid to the art of living is the possession of a robust philosophy of life.

"Religion attempts to satisfy this human hunger and, for untold thousands, it furnishes a morale and outlook that may be priceless.

"It is a strange fact, that while we are ready to study everything under the sun, we find ourselves reticent to examine ourselves—to examine our own lives.

"After we gain self knowledge our next step is the learning of self acceptance. This may be difficult if we find that our equipment appears to be modest.

"But I believe that everyone possesses an asset or two that is superior to that of his neighbor. And, if I am correct in this, there should be little reticence in taking the step of self-acceptance.

"The last hurdle is that of being ourselves. This constitutes the most significant element in the art of living. The individual who is aping others—who is attempting to do things as other people do them—who is hesitant to strike out on lines of his own volition, so individual is failing to contribute effectively to the world's work and is failing to get the satisfaction that comes from natural living.

"Now, a reference to childhood. We can go far in guiding the mental health of the child if we pay attention to such points as the following: his facility in social contacts, his range of interest; his development in relation to the assumption of responsibility; his degree of self-confidence, of self-discipline, of happiness and of love of adventure."

## Tees Tattle Tales

**By TATTLE**  
**TEES**—The first car of stock to be shipped for some time was forwarded during the past week by Harris Bros. and Meadows. It was a fine car of young steers fitted for the St. Paul market, to which they were sent.

G. E. Van Eaton has been distributing his purchased Poland-China hogs throughout the country during the last couple of weeks. There seems to be a demand for that class of hogs.

A humorous incident happened to Ken McDougall and family recently while listening to a very gruesome play (electrical transcription) on the radio. The villain was just ready to shoot when one of the condensers got so hot that it exploded. You can just imagine how it would feel. It was too realistic to have the pieces of tin which composed the cover to the condenser come tumbling around the listeners, who from their excitement just getting their tongues to twist right again and can be understood when they speak.

**Wins Many Grain Prizes**  
It was with great pleasure that we heard of the successes of A. W. Ardley at the Edmonton Seed Fair, where he won several prizes with his certified and registered seed grains. It shows that the judges in Alberta, at least, agree in part with the judges of the Toronto Royal Fair and the Chicago Fat Stock and Seed Grain Exhibition, where he also got into the money class with his exhibits.

On account of the deep snow and drifted condition of the roads, our curling squad has been unable to fill any of its engagements down at the big butter town. It is hoped they will not get out of practice easily because it looks as though the snow is going to get deeper and it may be ages before the next game.

Your reporter, that is the guy who catches the over-flow from the town pump, was unable to interview the crowd who went away for the week-end, so he will be unable to tell you why they should leave this beautiful little community. Of course they are all tight-lipped, but may let something out the next time we are gathered around the cracker barrel.

The Young People's Club is working hard to put on a play for next Saturday night and practices have been the general rule. It should be good. Then, after you leave the young people you get up and the used-to-be young. They are also practicing for a play to be put on some time in March. It is hard to get information on either play, as they are to be surprises—that is, the kind that, after we get home we will say, "Why, I never knew we had that talent in the district." We hope that is what they say, anyway.

Since the cream truck has to discontinue its route, due to the condition of the roads, a great influx of cream shippers has hit town, evening business considerably and making it necessary for the express agent to use both hands to handle the business.

Construction of the new State Credit House, on the corner of Railway and Main, has again been held up, as owing to a little error with the blue prints, it has been found necessary to re-plan.

**CARD OF THANKS**  
We wish to extend our heartfelt thanks and appreciation to our many friends for their help and sympathy during the illness and since the death of our dear son and brother, Donald. We wish especially to thank all those who sent floral tributes and also express our appreciation of the many kind letters of sympathy.

—Mr. and Mrs. Proudfoot and Family. f1p

## Outstanding Comedy Shows at Avalon

**"Theodora Goes Wild,"** a picture starring Irene Dunne and many other noted film stars, has been booked for Thursday, Friday and Saturday of this week at the Avalon Theatre, and those who delight in seeing a real comedy, brim full of action, are in for a treat.

Irene Dunne takes the part of a country girl who writes a supposedly daring book, which sweeps the country like wildfire, an assumed name on the title page covering her identity. In her home town the book is strongly condemned by the town's women-folk, and Irene is terrified for fear she will be revealed as the writer.

She goes to New York to see her publisher, becomes unwittingly involved in numerous escapades—and the news drifts back home, where she is spoken of in horror. She decides that if she has been branded as "fast" she might as well pretend that such is the case and give the "home folks" a thrill. It's a splendid comedy, with action from start to finish.

## Sunny Crest

The annual meeting of the Sunny Crest School District was held at the schoolhouse on Jan. 9th. There was a better attendance than last year, and as someone remarked: "It is a place to talk things over and help promote a greater interest in our district affairs."

Mr. H. Woods was elected trustee this year, the retiring trustee being Mr. E. Crooker. Mr. Crooker was given a vote of thanks for his past efforts as a member of the board. Mr. L. Saunders carries on as chairman and Mr. W. Caine as secretary-treasurer.

We are indeed fortunate, so far this winter, as far as sickness goes, there being so much in other districts. Mild cases of the flu, however, have appeared.

We are glad to hear Grandma Moore is up again after a week's confinement to her bed.

Miss Thelma Barr is visiting in the Meadowbrook district at the home of Mrs. W. Riley and Mrs. E. Gilland.

H. Woods and Ivor Wait have started lessons at Mr. E. Gottschlich's on the coronet and saxophone.

The class meeting Jan. 15th was held at the home of Mr. H. Woods when Rev. F. G. Mathews gave a talk on Temperance.

On the evening of Jan. 22nd Mr. L. Johnston and Mrs. Johnston entertained the young people and served refreshments. Mr. Mathews continued the lessons on Daniel.

We hear Mr. H. Gottschlich is planning on having a saw-mill at his place soon.

Mr. L. McLean has been absent three Sundays due to the flu. Harvey Fisher carried on as superintendent of the church and Rev. F. G. Mathews delivered the sermons. Prayer and Praise service was held at the home of Mrs. J. Fisher on Friday night, Jan. 8th, with 23 present.

Even the Welsh language has its limitations, said Mr. Oliver Stanley, president of the Board of Education, at a banquet in honor of Mr. Dan Edwards, president of the National Union of Teachers, in Cardiff.

Mr. Stanley's authority was Geo. Borrow, from whose "Wild Wales" he quoted this story:

"A young 'native' whom Borrow met in a remote part of Wales was cursing his horses in fluent English.

"Why don't you speak Welsh to them?" asked Borrow.

"Oh," replied the fellow. "It's no use speaking Welsh to them; Welsh isn't strong enough."

## Gull Lake

**GULL LAKE**—The Gull Lake Mutual Telephone Co. has completed its second successful year of operation. The line is paid for, leaving a surplus on the books. Two new subscribers, L. Cabelka and Alder Edlund, have been added to the line, bringing the total up to 18. Fees have been reduced from \$1.25 to \$1.00 per month, to go into effect after Jan. 1st, 1937. President H. Brownlow, Secretary-Treasurer H. Hansen and all directors were re-elected.

Harold Larsen underwent an operation in the Lacombe Hospital on Tuesday morning for quinsy. Latest reports are that he is doing nicely.

Gull Lake defeated Rainy Creek in hockey with a score of 6-1. Bruce Fernie, an "old standby," was nursing a fine crop of the measles the same day.

E. C. Moore has started the annual ice harvest. That is one crop that never fails in Alberta when the thermometer dips to the 40 below mark.

Mr. and Mrs. L. Cabelka returned from their honeymoon, spent in Calgary, recently. They are now settled in their new house on the groom's farm. The district joins in wishing them happiness and prosperity.

The stretch of highway 2½ miles east of Bentley has been giving many motorists trouble since the last storm. Saturday night and Sunday many cars were stranded in the huge drifts. Teams and shovels were in great demand.

This month's meeting of the Searchlight Club will be held at the home of Mrs. E. Morsch, as Mrs. Leiske is slightly indisposed.

## Seed Potatoes In Good Demand

Certified seed potatoes have been moving over very freely since harvest and prospects for future sales are good. The movement started in Nova Scotia as early as the third week in August and has continued from the Maritime Provinces more or less steadily all fall, mostly for export to foreign destinations, and principally to the United States, Cuba, Bermuda, British West Indies, Panama and Argentina.

The movement reached its peak in Prince Edward Island in November and a total of approximately 400,000 bushels of certified seed from the 1936 crop was moved to Dec. 1. There is, however, about sufficient seed left to meet the usual spring demand.

The certified seed crop in Nova Scotia has been largely disposed of and with promises of increased orders for some varieties, some of the operators are planning for an increased acreage for next season.

The export movement reached its peak in New Brunswick in September and early October, and total shipments for the fall months to Dec. 1 were 397,016 bushels. Supplies left on hand should suffice to meet ordinary local and export demand.

**Demand for Early Varieties**  
A good demand for early varieties is in prospect in Ontario as the crop of early varieties produced there is short of normal requirements, and some have been purchased by speculators in prospect of a rise in price next spring. There is about sufficient seed available of the early varieties to meet local demand, but a better fall market was in evidence than has been the case for some years.

The certified seed crop in the Prairie Provinces is short of requirements due to unfavorable seasonal conditions. The crop in British Columbia is about sufficient to meet local demand at good prices.

## Motor Clubs Adopt New Routing Plan

Motorists in all parts of the province will welcome a new system of tourist routings adopted at the Edmonton branch of the Alberta Motor Association and which will also be available at divisional headquarters at Calgary and Lethbridge.

J. A. McNeil, secretary of the A.M.A., has been in communication with the headquarters of the American Automobile Association and other centres in the United States concerning the latest system in routing tourists. As a result, a great deal of data has been obtained by Mr. McNeil, who has consolidated it for the benefit of Alberta motorists.

Thus, when an application is received for a routing to any part of the United States or Canada, the A.M.A. office will be able to furnish much more additional information than has been the case in the past. The motorist will be supplied with an amazing amount of detail concerning any favored route, besides much valuable material that will deal with the return trip.

During last year, the motor touring services operated by the A.M.A. showed increased popularity as holiday makers were routed in large numbers to all sections of the Dominion and south of the international border.

Demonstrating the increased interest in the A.M.A., the membership reports for January show material gains over the similar period of last year.
